Chege, 2013-05-24 Scientific Essay from the year 2013 in the subject Sociology Relationships and Family language English abstract The contemporary world has experienced a focus on development as a core influence on social economic and political spheres Equating the preoccupation with development to a discourse Escobar 86 91 notes the interpretation of societal development as a technical problem requiring rational decisionmaking and management entrusted to a group of people How such people conceptualize development has an impact on various groups in society In this case a male dominated outlook on development poses various effects on women explorable through exploring the various theoretical foundations on development Lindio MacGovern and Isidor 35 Several important theories conceptualized over the past half a century form the main ideas surrounding development one of which is the modernization theory Through taking the perspective of gendered development in which development affects men and women differently the present study analyzes impacts of development based on the modernization theory and global capitalism on women The study relies on scholarly works

covering development gendered development modernization theory and global capitalism The approach to the discussion entails an overview of development and modernization theory with a focus on the first world third world divide This discussion of development frameworks then ushers in an analysis of how such development impacts women The main theme under investigation is gendered development dwelling on the fate of women with the central argument being that development and paradigmatic development theories create opportunities and hindrances for the development of women

Development In Theory And Practice Jan Knippers Black,2018-02-12 As wealthy countries focus more attention on the ravages of poverty and maldistribution of the world s resources the rationales for what is or is not done in the name of development have become more elaborate and abstract And as the literature has proliferated communication among those who approach development from different perspectives disciplines and professions has become more strained In this innovative text Jan Black argues that what is missing is appropriate theory that can help place the findings of social scientists and seasoned development practitioners at the service of those who would promote a more equitable and empowering approach to development In the first section the author presents the differing and even contradictory definitions of development and the various explanatory models and means of measurement associated with them This is followed by an analysis of the evolution of development strategies and programs both of the First World donor countries and organizations and of Third World leaders movements and regional organizations The author highlights key issues in the development debate of the 1990s including ecology refugees debt the informal sector and gender roles In a final section she addresses the process of development and illustrates through a number of vignettes and case studies the sometimes illusory links between motives and consequences The second edition includes more paradoxes and case studies and increased coverage of refugees and indigenous peoples More information on the new states in post Soviet East and Central Europe is also incorporated At a time when theoreticians and practitioners appear to occupy different worlds and speak different languages and when a large number of developing countries seem to be falling into an irreversible cycle of debt and dependency this book is particularly welcome and compelling Economic Theories of Development Diana Hunt,1989 **Contemporary Social Development**
