for a parent conference with two moms or two dads The essays in this volume range from an analysis of gay stereotypes in teacher education textbooks to a discussion of queer multiculturalism to personal accounts by lesbian and gay teacher educators and heterosexual allies who are challenging homophobia and heterosexism in their own classrooms and programs All agree that education for sexual diversity is as important as education about all other forms of difference and that future teachers need to know how to create safe spaces for lesbian and gay students along with the children of gay families who are increasingly a part of the classroom landscape

Lewis,2020-12-21 How do you go from a bunch of cells to something that can think This question asked by the 9 year old son of one of the authors speaks to a puzzle that lies at the heart of this book How are we as humans able to explore such questions about our own origins the workings of our mind and more In this fascinating volume developmental psychologists Jeremy Carpendale and Charlie Lewis delve into how such human capacities for reflection and self awareness pinpoint a crucial facet of human intelligence that sets us apart from closely related species and artificial intelligence Richly illustrated with examples including questions and anecdotes from their own children they bring theories and research on children s development alive The accessible prose shepherds readers through scientific and philosophical debates translating complex theories and concepts for psychologists and non psychologists alike What Makes Us Human is a compelling introduction to current debates about the processes through which minds are constructed within relationships Challenging claims that aspects of thinking are inborn Jeremy Carpendale and Charlie Lewis provide a relationally grounded way of understanding human development by showing how the uniquely human capacities of language thinking and morality develop in children through social processes They explain the emergence of communication within the rich network of relationships in which babies develop Language is an extension of this earlier communication gradually also becoming a tool for thinking that can be applied to understanding others and morality Learning more about the development of what is right in front of us such as babies actions developing into communicative gestures leads to both greater appreciation of the children in our lives and a grasp of what makes us human This book will be of interest to anyone curious about the nature of language thinking and morality including students parents teachers and professionals working with children *Multiculturalism in Higher*

to These are some of the vital steps toward building a campus community that helps students develop a sense of belonging that allows them to persist and thrive in college The scholarship in this volume illustrates the state of multicultural education on college and university campuses The authors bridge foundational knowledge with contemporary understandings making the work both accessible for novices and beneficial for the authorities on multicultural education This volume provides thoughtful discourse on issues ranging from the racial and ethnic diversity of the student and faculty bodies and important topics like disability issues to different educational contexts such as community colleges HBCUs and HSI institutions
