

**Issue Brief: Developmental Education for Community College
Prospective: The State Board Research on Community College**

Thomas Bailey and Tony West (Nov. 4, 2008)

September 2008

While multiple efforts to expand the community college system will undoubtedly include developmental or remedial courses and testing, focused on these interventions, students are often categorized as "college ready," and not ready for college-level classes. In the interim, students are then are considered "developmental" or "remedial" students and are referred to remedial courses designed to bring them up to college standards. Many students are referred to remedial levels of coursework—some three levels or more down. These issues that many students avoid being academically prepared for admission of post-secondary institutions having prepared for these four college-level courses.

While a variety of other remedial courses are offered, the large majority consists of these students being developmental students in the comparison to those students being those referred to as the percent of remedial students are referred to as those developmental students. When it comes to those students that large majority of community college students are high school graduates, and the large majority of students in need of remedial instruction, the state education agency needs a whole curriculum.

Addressing the needs of developmental students is perhaps the most difficult and most important problem facing community colleges. Developmental students have immediate access to the quality of community college students who would be developmental students compared to degree or certificate holders, many of whom are in college. In comparison, those 40 percent of community college students who do not want to go to college or certificate holders have a degree or certificate in the college system. It will be very difficult to meet the "State education agency's goal of increasing the number of community college graduates by 5 million by 2020 without making significant progress in increasing numbers that include the percent of community college with remedial students' state.

In the final, we discuss the evidence about the effectiveness of interventions, as well as many more. The effectiveness of interventions and their potential implications about the progression of students through the developmental sequence. The current problems associated with the current environment and other critical elements that exist. We also discuss these elements designed to improve the performance of remedial students.

Student Success in Community Colleges Deborah J. Boroch, Laura Hope, Bruce M. Smith, Robert S. Gabriner, Pamela M. Mery, Robert M. Johnstone, Rose Asera, 2010-02-22 *Student Success in Community Colleges* As more and more underprepared students enroll in college basic skills education is an increasing concern for all higher education institutions *Student Success in Community Colleges* offers education leaders administrators faculty and staff an essential resource for helping these students succeed and advance in college By applying the book's self assessment instrument colleges can pinpoint how their current activities align with the most effective proven practices Once the gaps are identified community college leaders can determine the best strategic direction for improvement Drawing on a broad knowledge base and illustrative examples from the most current literature the authors cover organizational administrative and instructional practices program components student support services and strategies and professional learning and development Designed to help engage community college leadership and practitioners in addressing the practices structures and obstacles that enhance or impede the success of basic skills students the book's strategies can be tailored to various institutional levels showing how to unite faculty staff and administrators in a cooperative effort to effect institutional change Finally *Student Success in Community Colleges* reveals how investing in a comprehensive basic skills infrastructure can be a financially sustainable model for the institution as well as substantially beneficial to students and society This is a most unusual and valuable book it is packed with careful analysis and practical suggestions for improving basic skills programs in community colleges Compiled by a team of practicing professionals in teaching administration and research it is knowledgeable about what has been done and imaginative and practical about what can be done to improve the access and success of community college students K Patricia Cross professor of higher education emerita University of California Berkeley For its first hundred years the community college was committed primarily to access in its second hundred years the commitment has changed dramatically to success This book provides the best road map to date on how community colleges can reach that goal Terry O Banion president emeritus League for Innovation and director Community College Leadership Program Walden University This guide is the most comprehensive source of information about all facets of basic skills or developmental education It will be invaluable not just to community college educators across the nation but also to those in high schools and four year colleges who share similar problems W Norton Grubb David Gardner Chair in Higher Education University of California Berkeley

Basic Skills Education in Community Colleges W Norton Grubb, 2013-01-04 Nearly two thirds of students require some form of remediation before taking college level classes and community colleges have become increasingly important in providing this education Unfortunately relatively few students complete the developmental courses required to make a transition to college level work Based on a three year study of over twenty community colleges *Basic Skills Education in Community Colleges* analyzes developmental education practices exploring what goes wrong and what goes right and

provides a series of recommendations for improved practice Including both classroom observations and interviews with administrators faculty and students this valuable book balances critique with examples of innovation Part One explores the instructional settings of basic skills the use of drill and practice and remedial pedagogy in math reading writing and ESL as well as innovations in colleges that show developmental education need not follow remedial pedagogy Part Two examines institutional factors shaping basic skills and provides recommendations for improving the quality of basic skills instruction The research grounded observations and recommendations in Basic Skills Education in Community Colleges make this an invaluable resource for scholars administrators and faculty aiming to help students progress through developmental education to college level work and beyond Responding to the Challenges of Developmental Education Carol A.

Kozeracki,2005-04-20 Developmental education is a core mission of the community college and approximately 40 percent of entering community college students enroll in one or more developmental math English or reading courses The existing literature recommends several instructional and organization practices for developmental educators to follow in addressing the needs of those students Despite the availability of these models however community colleges each facing its own unique combination of students needs and available resources continue to struggle in their efforts to effectively educate underprepared students and help them move onto and succeed in college level courses This volume of New Directions for Community Colleges offers a realistic assessment of the difficulties community colleges face in attempting to assist students who share the common characteristic of being underprepared for college level work but whose backgrounds academic preparation motivational levels and goals are extraordinarily varied The authors discuss the dangers of isolating developmental students faculty and curriculum from the broader academic structure of the college They provide examples of successful programs and offer a range of recommendations that college administrators can adapt to their campuses and student populations They also call for additional research on developmental education especially systematic assessments of existing programs and qualitative research that captures the perceptions of the students for whom these programs are designed **Understanding Community Colleges** John S. Levin,Susan T. Kater,2018-03-21 Understanding Community

Colleges provides a critical examination of contemporary issues and practices and policy of community colleges This contributed volume brings together highly respected scholars as well as new scholars for a comprehensive analysis of the community college landscape including management and governance finance student demographics and development teaching and learning policy faculty and workforce development At the end of each chapter the Questions for Discussion section helps to bridge the gap between research and practice Written for students enrolled in higher education and community college graduate programs as well as social sciences scholars this provocative new edition covers the latest developments in the field including trends in enrollment developmental education student services funding and shared governance **Challenge and Opportunity** Thomas Bailey,2008 In the paper I review evidence on the number of students

who enter community colleges with weak academic skills and on the incidence of developmental education I then report on what happens to developmental students and review the research on the effectiveness of programs at community colleges designed to strengthen weak academic skills I briefly discuss the costs of these programs I conclude by arguing that on average developmental education as it is now practiced is not very effective in overcoming academic weaknesses partly because the majority of students referred to developmental education do not finish the sequences to which they are referred Yet there is reason for optimism In recent years a dramatic expansion in experimentation with new approaches to strengthen student skills has taken place There is now a growing commitment to better evaluation and quantitative analysis of student progression in community colleges that promises a more systematic and informed process of program and policy development I suggest a broad developmental education reform agenda based on a comprehensive approach to assessment more rigorous research that explicitly tracks students with weak academic skills through their early experiences at community colleges a blurring of the distinction between developmental and college level students that could improve pedagogy for both groups of students and strategies to streamline developmental programs and accelerate students progress toward engagement in college level work Contains 9 footnotes and 1 figure

Referral, Enrollment, and Completion in Developmental Education Sequences in Community Colleges. CCRC Working Paper Thomas Bailey, Dong Wook Jeong, Sung-Woo Cho, 2008 After being assessed many students entering community colleges are referred to one or more levels of developmental education While the need to assist students with weak academic skills is well known little research has examined student progression through multiple levels of developmental education and into entry level college courses The purpose of this paper is to analyze the patterns and determinants of student progression through sequences of developmental education starting from initial referral We rely primarily on a micro level longitudinal dataset that includes detailed information about student progression through developmental education This dataset was collected as part of the national community college initiative Achieving the Dream Community Colleges Count The dataset has many advantages but it is not nationally representative therefore we check our results against a national dataset the National Education Longitudinal Study of 1988 Our results indicate that only 3 to 4 out of 10 students who are referred to remediation actually complete the entire sequence to which they are referred Most students exit in the beginning of their developmental sequence almost half fail to complete the first course in their sequence The results also show that more students exit their developmental sequences because they did not enroll in the first or a subsequent course than because they failed a course in which they were enrolled We also show that men older students Black students part time students and students in vocational programs are less likely to progress through their full remedial sequences Finally we provide weaker evidence that some institutional characteristics are related to a lower probability of completion of developmental education Contains 7 tables and 7 figures

Community College Missions Kristin Bailey Wilson, Regina L. Garza Mitchell, 2018-01-24 Historically community colleges have served societal and functional missions that expanded over time with the result of trying to achieve multiple goals for multiple audiences This volume explores the forces currently shaping community college missions and the resulting tension between stated goals assumed goals and achievement of those goals In an era of increasing accountability tighter coupling and the need to do ever more with fewer resources mission focus is vital to college survival Explore such issues as the unspoken social contract transfer developmental education noncredit education dual enrollment workforce development the free college movement and planning for the future The topics are explored thoughtfully from both scholarly and practical perspectives highlighting the forces that shape community college missions This is the 180th volume of this Jossey Bass quarterly report series Essential to the professional libraries of presidents vice presidents deans and other leaders in today's open door institutions *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission The Interpretive Process of North Carolina Community College System Developmental Education Policy at Select Community Colleges John Paul Black, 2008 The purpose of this study was to examine the interpretive processes of administrators and staff at individual community colleges in the North Carolina system The study examines how developmental education policy established at the state level is interpreted and applied at the local community college The study examines how administrators and staff in the North Carolina system interpret their role in

serving growing numbers of new and returning college students many under prepared for college level work In particular the study looks at internal and external influences that shape the interpretive process for individual administrators and staff as they balance the influences of state legislators and state higher education authorities with local needs in serving under prepared students at the local community college The study used a qualitative case study methodology to examine local developmental education policy at three community colleges in the North Carolina system The study used current research on developmental education policies from a variety of states as a point of reference for the processes that take place at local community colleges in the North Carolina system In addition it used leadership theory to guide the study of internal organizational processes at local colleges and institutional policies at the state level From the research conducted I have concluded that community college administrators and staff are following a process of interpretation that considers local organizational influences local community influences and external institutional influences as part of a larger state system

Implementing Effective Policies for Remedial and Developmental Education Jan M. Ignash, 1998-01-12 In 1894 forty percent of college freshmen enrolled in pre collegiate programs to prepare for regular college coursework In Fall 1995 twenty nine percent of entering freshmen enrolled in at least one remedial course The debate over the need for and appropriateness of remedial and developmental education at the postsecondary level has spanned a century The 1998 Reauthorization of the Higher Education Act has added fuel to the debate Legislators educators and the general public are asking questions and raising accountability issues Who needs remedial and developmental education Why does the need for it appear to be increasing How much does it cost Who should pay for it Are remedial and developmental programs effective Who should provide it Legislators and the public are upset over the perception that they are paying twice for the same education once in high school and once again in college Educators are concerned about the potential devaluation of higher education through the provision of large amounts of remedial and developmental education And students too are unhappy with the time and expense necessary to develop English and math skills that they should have learned in high school Each chapter of this volume addresses a specific policy question involved in the debate over remedial and developmental education and uses national and state data as well as information from case studies of individual institutions to provide insights into effective approaches to remedial and developmental education This is the one hundredth issue of the quarterly journal *New Directions for Community Colleges* Faculty Perceptions of Developmental Education Delivery Changes in Nebraska Community Colleges David W.
