Word-formation and Creolisation Maria Braun, 2009 This book presents a comprehensive account of the word formation patterns of an English based creole language Sranan as found in its earliest sources and compares them with the patterns attested in the input languages It shows that the emergence of the patterns involved a variety of sources and mechanisms and was characterised by the absence of superstrate derivational affixes the use of free morphemes as derivational markers and of compounding as the major word formation strategy The findings render untenable theoretical accounts of creole genesis based on one explanatory factor Book Jacket
