Globalization Dimensions & Impacts Evren Denктаş, Bengü Doğangün Yasa, Gülten Dursun, Sema Yılmaz Genç, Hilal Yıldız, Keremet Shaiymbetova, Figen Büyükkakın, Zişan Kılıçkan, İsmail Şiriner, Keremet Shayymbetova, Murat Aydın, Mustafa Doğan, Nilay Etiler, Kuvvet Lordoğlu, Ayhan Orhan, 2015-04-30 The concept of globalisation is essentially about the increasing economic political cultural and technological intergradation with increasing speed depth and breadth Globalisation has become a buzz word in many academic debates especially amongst those who use the concept to describe the spread of global capitalism market the declining role of the state and globalisation of civil society Harvey 2005 Harmon 2009 Chomsky 1999 Saad Filho and Johnston 2004 In short Harvey defines neoliberalism as a theory of political economic practices that proposes that human well being can best be advanced by liberating individual entrepreneurial freedoms and skills within an institutional framework characterized by strong private property rights free markets and free trade The role of the state is to create and preserve an institutional framework appropriate to such practices The state has to guarantee for example the quality and integrity of money It must also set up those military defence police and legal structures and functions required to secure private property rights and to guarantee by force if need be the proper functioning of markets Furthermore if markets do not exist in areas such as land water education health care social security or environmental pollution then they must be created by state action if necessary Harvey 2005 2 This has become an all encompassing term for differing economic and political projects What essentially new liberalism has in common is that the state should be minimal as the competition of the market will bring economic efficiency and choice The crisis of capitalism in the late 1970s and 1980s has opened the gap for

neoliberal ideas to have resonance as a solution to global capitalism. Despite their political, historical, geographical and economic differences, nearly every country in the world, especially in the global south, has implemented neoliberal policies in some form. The policies have become an increasingly real alternative to overcome the predicament of the world economy. With the demise of Soviet ideology, the advocates of the free market liberalism in the world, particularly in the USA, saw this as an opportunity to reassert their power globally. Hence, the globalisation of the world economy is claimed to serve the great majority of the world's people and it will liberate the poor countries because they will have free domestic and international trade and more open financial markets. Wade 2004: 38. At the core of globalisation lies the belief that a country must promote the private sector as the primary engine of its economic growth by shrinking the size of its state bureaucracy, increasing exports, privatising state-owned industries and utilities, and deregulating capital markets. Friedman 1999. The process that led to claim that the state, that artefact of the eighteenth and nineteenth centuries, has begun to crumble. Ohmea 1995: 7. With the international system, the borders are no longer necessary and the international commerce would become free from the cumbersome constraints of state interference. However, the reality after nearly three decades of globalisation has not been drastically different from much of the world; the international system has yet to witness universalization of democracy or wealth. In fact, one of the consequences of globalisation appears to have been the poor growth and polarisation of wealth. Morady. They have been responsible to regulate and implement policies to suit the market. Mustafa Doan also looks at the local development issue yet assessing the role of ecomuseums in Turkey. Whilst the principles of sustainable local development are now widely implemented across the world at the same time are protecting cultural and natural assets. The article will provide an overview on ecomuseums that they are focused on a specific place or territory and on the relationship between the population and their environment, culture and local history. He will argue that ecomuseums have been utilized as a major means of promoting sustainable development in many rural areas of the world by conserving natural, historical and sociocultural resources of a locality whilst recognising a place's potential to provide low level tourism and economic social opportunities. The empirical work of the paper is based on ecomuseum and social economic development in Boatepe village in the province of Kars in Turkey. One of the consequences of globalisation is migration and gender as it is becoming a major socioeconomic study. The feminisation of migration as defining the number of women at international labour migration has been increasing in recent years. Nilay Etiler and Kuvvet Lordolu will assess the health problems of recent female migrants. They will argue that women migrants are mostly employed in jobs that are appropriate to their gender roles such as housework or childcare. Whilst the health of migrants as a whole deteriorate because of poor living and working conditions, the female workers suffer more especially in the area of mental health. Ayhan Orhan focuses on the property rights of natural Resources in a globalised world. He examines the rapid change of natural resource distribution since the 1990s which has added a new dimension to the concept of property rights. Hence, he argues that natural resources and property rights could

not be treated independently from Multi National Companies or the states As a last contributor of this volume of globalization Farhang Morady argues that Iran's strategy to balance between the US on the one hand and China Russia and India on the other was a failure According to his determinations the end of the Cold War and the emergence of new independent republics in Central Asia offered Iran the opportunity to become a vital actor in the geopolitics of the region Iran was seen as a possible corridor between Central Asia the Persian Gulf and the Indian Ocean Region IOR Struggling against US policy of strategic isolation Iran made concerted efforts to break out of it by cultivating closer ties with non Western powers It used diplomacy energy and trade for the purpose of balancing its foreign relations His paper will assess the strategic ambitions of Iran as a regional power and the degree of its success in combating Western imposed sanctions and the US military threat over the disputed nuclear programme This balancing against the West was the dominant approach during the Conservative presidency of Mahmoud Ahmadinejad In the paper he figures out that it reflects a changed approach to serving Iran's interest by working with and not against the West Due to nuclear détente growing strategic convergence with the US in Iraq and Afghanistan and the American shift in emphasis to the Pacific Iran has an invaluable opportunity to re emerge as a crucial member in the Indian Ocean Region We hope this addition of globalisation will provide some ideas to inspire

academics and students not only to what the world is facing but some solutions as well **GLOBALIZATION: EXPLORING ITS CONCEPTS AND DEBATES** Dr. Rita Saikia, Rodali Mohan, 2024-07-05 The present era is an era of interconnectedness In the present context we are trying to explore the multifaceted dimensions of globalization through a book called Globalization exploring its Concepts and Debates It is a collection of research papers and articles contributed by esteemed academicians from different backgrounds This book serves as a comprehensive guide unravelling the complexities of globalization across various disciplines including economics politics sociology culture science and technology and so on It explores how globalization has influenced economic systems trade patterns flow of capital etc presenting a nuanced understanding of its impact on both the developing and developed countries Furthermore this book delves into the political dimensions of globalization including power dynamics governance structures international relations etc Moreover this book also addresses the socio cultural aspects of globalization investigating its impact on religion identity culture gender social movements Through a series of thought provoking analysis and insightful discussions this book will attract the readers to critically engage with the topic of globalization and its opportunities and challenges It will further definitely be an indispensable resource for academicians scholars students policymakers and anyone who has an interest in understanding globalization in the present scenario Global Bioethics Henk ten Have, 2016-02-10 The panorama of bioethical problems is different today Patients travel to Thailand for fast surgery commercial surrogate mothers in India deliver babies to parents in rich countries organs body parts and tissues are trafficked from East to Western Europe physicians and nurses migrating from Africa to the U S thousands of children or patients with malaria tuberculosis and AIDS are dying each day because they

cannot afford effective drugs that are too expensive Mainstream bioethics as it has developed during the last 50 years in Western countries is evolving into a broader approach that is relevant for people across the world and is focused on new global problems This book provides an introduction into the new field of global bioethics Addressing these problems requires a broader vision of bioethics that not only goes beyond the current emphasis on individual autonomy but that criticizes the social economic and political context that is producing the problems at global level This book argues that global bioethics is a necessity because the social economic and environmental effects of globalization require critical responses Global bioethics is not a finished product that can simply be applied to solve global problems but it is the ongoing result of interaction and exchange between local practices and global discourse It combines recognition of differences and respect for cultural diversity with convergence towards common perspectives and shared values The book examines the nature of global problems as well as the type of responses that are needed in order to exemplify the substance of global bioethics It discusses the ethical frameworks that are available for global discourse and shows how these are transformed into global governance mechanisms and practices
