of others and look at the conditions under which certain behaviour actions and feelings occur Social psychology is concerned with the way these feelings thoughts beliefs intentions and goals are constructed and how such psychological factors in turn influence our interactions with others Social psychology is an interdisciplinary domain that bridges the gap between psychology and sociology Hope this book will be useful to students as a reference book and will be a priced collection for their own library Contents Intelligence and Creativity Relationship Clinical and Growth Approaches to Personality Personality Assessment Projective Psychometric and Behavioural Measures Psychology of Self Research Designs Correlational Factorial Randomized Block Matched Group Quasi Experimental Time Series Design Psychological Scaling Purpose and Methods Current Trends in Social Psychology
