

Interview Questions

- Lominger interview questions are designed to elicit responses that highlight aspects of candidates' personalities, such as flexibility and adaptability to change, both considered positive competencies. Stallers, which generally indicate a trouble with people or trouble with results, can also be identified through this process; for example, inflexibility is considered a staller, as is an inability to change direction when necessary. Other positive competencies include interpersonal savvy, good business acumen, ability to delegate, career ambition, intellectual horsepower, and the ability to listen, among many others.
