Gallego, Aritz Irurtzun, 2020-12-24 The study of language has changed substantially in the last decades In particular the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers judgments surveys corpus studies or fieldwork This move is an enriching feature of contemporary linguistics allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact Chomsky 2005 This has generated some sort of divergence not only in research approaches but also in the phenomena studied with an increasing specialization between subfields and accounts At the same time it has also led to subfield isolation and methodological a priori with some researchers even claiming that theoretical linguistics has little to offer to cognitive science see for instance Edelman Phillips den Dikken Bernstein Tortora Sprouse Sch tze Phillips 2013 **Behavioral and Neurophysiological Approaches to Code-Switching and Language Switching** Jeanine Treffers-Daller, Esther Ruigendijk, Julia Elisabeth Hofweber, 2021-05-03 Linguistic Morphology in the Mind and Brain Davide Crepaldi, 2023-02-27 Linguistic Morphology is a unique collection of cutting edge research in the psycholinguistics of morphology offering a comprehensive overview of this interdisciplinary field This book brings together world leading experts
