Information Retrieval Stefan M. R ger,2010 Supporting users in their resource discovery mission when hunting for multimedia material is not a technological indexing problem alone We look at interactiveways of engaging with repositories through browsing and relevance feedback roping in geographical context and providing visual summaries for videos The book concludes with an overview of state of the art research projects in the area of multimedia information retrieval which gives an indication of the research and development trends and thereby a glimpse of the future world *Indexing*

Multimedia and Creative Works Pauline Rafferty,Rob Hidderley,2017-03-02 Indexing and information retrieval work properly only if language and interpretation are shared by creator and user This is more complex for non verbal media The authors of *Indexing Multimedia and Creative Works* explore these challenges against a background of different theories of language and communication particularly semiotics questioning the possibility of ideal multimedia indexing After surveying traditional approaches to information retrieval IR and organization in relation to issues of meaning particularly Panofsky s levels of meaning Pauline Rafferty and Rob Hidderley weigh up the effectiveness of major IR tools cataloguing classification and indexing and computerised IR highlighting key questions raised by state of the art computer language processing systems Introducing the reader to the fundamentals of semiotics through the thinking of Saussure Peirce and Sonesson they make the case for this as the basis for successful multimedia information retrieval The authors then describe specific multimedia information retrieval tools namely the Art and Architecture Thesaurus Iconclass and the Library of Congress Thesaurus of General Materials I and II A selection of multimedia objects including photographic images abstract images music the spoken word and film are read using analytical and descriptive categories derived from the literature of semiotics Multimedia information retrieval tools are also used to index the multimedia objects an exercise which demonstrates the richness of the semiotic approach and the limitations of controlled vocabulary systems In the final chapter the authors reflect on the issues thrown up by this comparison and explore alternatives such as democratic user generated indexing as an alternative Primarily intended for third year undergraduate and postgraduate information studies students the breadth and depth of *Indexing Multimedia and Creative Works* will also make it relevant and fascinating rea **Image and Video Compression**
