Palmer, Elijah Siegler, 2017-11-27 Over the past few decades Daoism has become a recognizable part of Western alternative spiritual life Now that Westernized version of Daoism is going full circle traveling back from America and Europe to influence Daoism in

China Dream Trippers draws on more than a decade of ethnographic work with Daoist monks and Western seekers to trace the spread of Westernized Daoism in contemporary China David A Palmer and Elijah Siegler take us into the daily life of the monastic community atop the mountain of Huashan and explore its relationship to the socialist state They follow the international circuit of Daoist energy tourism which connects a number of sites throughout China and examine the controversies around Western scholars who become practitioners and promoters of Daoism Throughout are lively portrayals of encounters among the book's various characters Chinese hermits and monks Western seekers and scholar practitioners as they interact with each other in obtuse often humorous and yet sometimes enlightening and transformative ways Dream Trippers untangles the anxieties confusions and ambiguities that arise as Chinese and American practitioners balance cosmological attunement and radical spiritual individualism in their search for authenticity in a globalized world

Technology and Science in Ancient Civilizations Richard G. Olson, 2009-12-21 Why did the Greeks excel in geometry but lag behind the Mesopotamians in arithmetic How were the great pyramids of Egypt and the Han tombs in China constructed What did the complex system of canals and dykes in the Tigris and Euphrates river valley have to do with the deforestation of Lebanon's famed cedar forests This work presents a cross cultural comparison of the ways in which the ancients learned about and preserved their knowledge of the natural world and the ways in which they developed technologies that enabled them to adapt to and shape their surroundings Covering the major ancient civilizations those of Mesopotamia Egypt China Greece the Indus Valley and Meso America Olson explores how language and numbering systems influenced the social structure how seemingly beneficial construction projects affected a civilization's rise or decline how religion and magic shaped both medicine and agriculture and how trade and the resulting cultural interactions transformed the making of both everyday household items and items intended as art Along the way Olson delves into how scientific knowledge and its technological applications changed the daily lives of the ancients **A Study of Chinese Alchemy** Obed Simon

Johnson, 1928 **Daoist Internal Alchemy** Jerry Alan Johnson, 2013 This book describes traditional methods of both ancient and modern forms of Chinese Mysticism Daoist occult magic and is not intended to persuade the readers in any way shape or form to believe in or practice sorcery Any person attempting such rituals is doing so at his or her own risk Additionally sometimes Daoist exercises and meditations require special herbal formulas as well as the regulation of the individual's diet e.g. fasting and living environment solidarity It is important to note that herbal prescriptions will vary according to the individual's constitution condition and specific goal and must be treated accordingly only by a doctor or herbalist qualified to prescribe Chinese medicinal herbs publisher Buddhism and Society Melford E. Spiro, 1982-05-27 The current Western interest in Buddhism and other Eastern religions is among other reasons both the result of and the stimulation for an entire library of books purporting to bring the Wisdom of the East to an audience for whom the wisdom of the West has failed This book is not an example of that genre It is an attempt to interpret Buddhism in the light of some

current theories about religion As a work of scholarship rather than a homiletic tract or an apologetic treatise its aim is to understand Buddhism as one historical variant of the generic human attempt to find meaning and hope in a sacred order that transcends the mundane order of existence its aim is not to encourage or discourage either a devotional or a soteriological interest in Buddhism *Eight Extraordinary Channels - Qi Jing Ba Mai* David Twicken, 2013-06-28 The Eight Extraordinary channels are amongst the most interesting and clinically important aspects of Chinese medicine This book introduces the theory behind the channels explains their clinical applications and delves into their emotional and spiritual qualities as well as exploring how to cultivate the channels through Nei Gong Emergent Social Complexity in the Yangshao Culture Xiaolin Ma, 2005 This work addresses the question of the emergence of social complexity in the Yangshao culture ca 4900 3000 BC in Central China based on analysis of settlement patterns and faunal remains from Lingbao western Henan A total of 31 Neolithic sites have been found along two rivers during a regional survey in 1999 Analyses of regional settlement patterns reveal the emergence of social complexity in the middle Yangshao period ca 4000 3500 BC indicated by dramatic population growth increases in site number and occupation area and the appearance of settlement hierarchies The Encyclopedia of Taoism Fabrizio Pregadio, 2013-05-13 The Encyclopedia of Taoism provides comprehensive coverage of Taoist religion thought and history reflecting the current state of Taoist scholarship Taoist studies have progressed beyond any expectation in recent years Researchers in a number of languages have investigated topics virtually unknown only a few years previously while others have surveyed for the first time textual doctrinal and ritual corpora The Encyclopedia presents the full gamut of this new research The work contains approximately 1 750 entries which fall into the following broad categories surveys of general topics schools and traditions persons texts terms deities immortals temples and other sacred sites Terms are given in their original characters transliterated and translated Entries are thoroughly cross referenced and in addition see also listings are given at the foot of many entries Attached to each entry are references taking the reader to a master bibliography at the end of the work There is chronology of Taoism and the whole is thoroughly indexed There is no reference work comparable to the Encyclopedia of Taoism in scope and focus Authored by an international body of experts the Encyclopedia will be an essential addition to libraries serving students and scholars in the fields of religious studies philosophy and religion and Asian history and culture Science and Technology in Modern China, 1880s-1940s, 2014-02-20 The first of its kind this collection of critical essays opens up new venues in the comparative study of science and culture by focusing on the formative decades of modern China in the late nineteenth and first half of the twentieth century It provides a wide ranging examination of the cultural and intellectual history of science and technology in modern China From anti imperialism to the technology of Chinese writing the commodification of novelties to the rise of the modern professional scientist new lexica and appropriations of the past the contributors map out a transregional and global circuitry of modern knowledge and practical know how nationalism and the amalgamation of new social practices Contributors include Iwo Amelung Fa ti Fan Shen

The Subtle Energy Body Maureen Lockhart, 2010-09-23 A global study of the psychospiritual body and its central role in the esoteric and spiritual traditions of the world Explains the nature purpose and functions of the subtle body Explores the role of the subtle body in such traditions as Alchemy Ayurveda Tantra Qi Gong and Yoga Shows how the various layers of the subtle body provide a map for various levels of consciousness Ancient traditions of both the East and West have long maintained that the human being is a complex of material and nonmaterial systems or energy bodies The subtle body is an energetic psychospiritual entity of several layers of increasing subtlety and metaphysical significance through which the aspirant seeks knowledge of the self and the nature of God In many traditions the component parts of the subtle body serve as a map of the different levels of consciousness The practices and disciplines that evolved from an awareness and understanding of the subtle body and how the material and nonmaterial work together form a coherent system of psychospiritual transformation that is central to numerous and extremely diverse spiritual practices including those of the Gnostics Sufis Native Americans Vedic seers Chinese and Greeks The subtle body plays an essential part in more recent traditions such as Anthroposophy and Gurdjieff's Fourth Way and the cutting edge science of Ervin Laszlo's research into the Akashic field But the benefits of understanding the role of the subtle energy body are not confined solely to the spiritual plane The energetic bodies provide a coherent system of life affirming principles and practices for the diagnosis and treatment of the whole person that is not only part of many traditional healing systems such as Acupuncture and Ayurveda but also is forming the basis for a synthesis of traditional and contemporary healing practices that could lay the foundation for the medicine of the future
