*The Death of Science* Andrew Holster, 2016-07-26 Modern science is in unprecedented crisis It is a crisis at many levels continuous with larger crises of modern society It is a crisis for the vocation of the scientist working within the modern institutionalised structures of science It is a crisis for our capacity to use science benevolently to help solve larger material organisational and ultimately political problems of the modern era And it is a crisis for philosophy for the role of natural science to help inform our world view The Death of Science is an account of deeper causes of this malaise It starts by taking up the reins of L pez Corredoira s 2013 The Twilight of the Scientific Age a recent critique that concludes with modern science on its death bed It dissects key themes in detail illustrated in the same frank style drawing on personal examples It starts with deep issues in the philosophy of science recounting failed modern concepts of scientific progress method and truth going on to failures of peer review and gate keeping as quality control systems the domination of propaganda and marketing channels as the critical tools for professional success and the major outcome for creative scientists themselves the destruction of scientific creativity and exclusion of heterodox thinkers in this degraded environment It connects the behavioural symptoms with a psycho social analysis of the bureaucratic mode of organisation under which science like all other modern vocations is now subsumed The account supports L pez Corredoira s appraisal which sees a modern science industry driven by greed and ambition repressing imagination and freedom destructive of novelty and diversity of ideas controlled by bureaucratic academic power hierarchies While science is irrevocably corrupted by its modern mass institutionalisation the true spirit of science can only be sustained by individuals with a real vocation as scientists or natural philosophers who seek understanding and meaning and wisdom rather than technocratic specialisation and careers But it is increasingly impossible for scientists to withstand forces of professional conformity and maintain their personal sense of value A number of current controversies in some core sciences are also discussed and it is argued that the greatest revelations of real science are yet to come While Establishment Science has locked itself into dogmatic paradigms the failures of present theories show that we are really on the cusp of major revolutions spanning sciences of physics and cosmology information and intelligence biology and evolution and mind and consciousness If these are realised they will profoundly change our understanding of the nature of the world and ourselves But any such revolutions challenge a Science Establishment locked into the self interest of its power brokers and are unlikely to occur except through independent scientists working outside the institutional system The book concludes with a brief discussion of the place of independent scientists

Routledge Handbook of Sustainability and Fashion recognizes the complexity of aligning fashion with sustainability. It explores fashion and sustainability at the levels of products, processes and paradigms and takes a truly multi-disciplinary approach to critically question and suggest creative responses to issues of Fashion in a post-growth society. Fashion diversity and equity, Fashion fluidity and balance across natural, social and economic systems. This handbook is a unique resource for a wide range of scholars and students in the social sciences, arts and humanities interested in sustainability and fashion. *Handbook of Ratings* Alexander Karminsky, Andrey Polozov, 2016-08-04. This handbook presents a systematic overview of approaches to diversity and problems involved in interdisciplinary rating methodologies. Historically, the purpose of ratings is to achieve information transparency regarding a given body's activities, whether in the field of finance, banking or sports, for example. This book focuses on commonly used rating methods in three important fields: finance, sports and the social sector. In the world of finance, investment decisions are largely shaped by how positively or negatively economies or financial instruments are rated. Ratings have thus become a basis of trust for investors. Similarly, sports evaluation and funding are largely based on core ratings. From local communities to groups of nations, public investment and funding are also dependent on how these bodies are continuously rated against expected performance targets. As such ratings need to reflect the consensus of all stakeholders on selected aspects of the work and how to evaluate their success, the public should also have the opportunity to participate in this process. The authors examine current rating approaches from a variety of proposals that are closest to the public consensus, analyzing the rating models and summarizing the methods of their construction. This handbook offers a valuable reference guide for managers, analysts, economists, business informatics specialists and researchers alike. Child Abuse and Neglect India Bryce, Yolande Robinson, Wayne Petherick, 2019-02-02. Child Abuse and Neglect: Forensic Issues in Evidence, Impact and Management provides an overview of all aspects of child abuse and neglect, approaching the topic from several viewpoints. First, child abuse is considered from both victimization and offending perspectives, and although empirical scholarship informs much of the content, there is applied material from international experts and practitioners in the field, from policing to child safety and intelligence. The content is presented to align with university semester timetables in three parts, including: 1. Typologies, methods and platforms for abuse; 2. Impacts and prevention; and 3. Issues surrounding recognition and management of child abuse. This book fills a void in the available university-level classroom-targeted literature, promoting the inclusion of child abuse as a standalone subject within university curricula. As such, readership includes undergraduate and postgraduate students, teachers and wider scholarship, as well as practitioners, including those from psychology, criminology, criminal justice and law enforcement. Presents an up-to-date approach that tackles child abuse.

from several viewpoints Includes typologies risk and protective factors recognition responses biopsychosocial outcomes public policy prevention institutional abuse children and corrections treatment and management and myths and fallacies Provides information on significant advances in knowledge areas such as disclosure the neurological effects of child abuse and neuroplasticity and online and virtual child abuse
