Hospital Infection Prevention Chand Wattal,Nancy Khardori,2013-10-30 The art of medicine becomes science when supported by evidence The recommended practices of infection prevention are based on scientific and epidemiologic evidence However most health care professionals see them as mandates and fail to incorporate them into their routine patient care activities The core goal of this publication is to link the practices to the principles they are based on The expectation is that understanding of the principles will change the practices from mandates to should do in the minds of health care professionals This will lead to improvement in health care by preventing unintended harm to patients co workers and the communities at large At the same time the text provides a comprehensive thorough and up to date information on all aspects of infection prevention in a reader friendly manner and therefore will serve as a valuable reference **Handbook of Community Medicine , Nepal at the Dawn of the 21st Century** Narayan Bahadur Basnet,2001 **Early Childhood**
