Robert Allen Palmatier

Key Linguistic Terms And Concepts Kimenyi:

The Linguistic Reporter, 1981 **The Oxford Guide to the Bantu Languages** Lutz Marten, Ellen Hurst-Harosh, Nancy C. Kula, Jochen Zeller, 2025-08-19 This volume brings together leading scholars from Africa Europe the Americas and beyond to provide a detailed account of the languages of the Bantu family which cover an area from Cameroon and Kenya in the north to South Africa in the south The Bantu family is part of the Niger Congo phylum and one of the world's biggest language groups comprising around 500 languages The family includes major languages with large numbers of speakers such as Zulu Kinyarwanda and Swahili the most widely spoken and taught African language as well as many community languages and several endangered languages Bantu languages feature prominently in the complex and multilingual language ecologies that are characteristic of the linguistic situation in much of Africa and they provide rich evidence for the study of theoretical and comparative linguistics language contact and language change They play an important role in education commerce culture and artistic expression in the media and public discourse in governance and social justice and are central to the future of the continent and the well being of its communities The first part of *The Oxford Guide to the Bantu Languages* provides background and context with chapters exploring the history of research in the field language and prehistory in Bantu speaking Africa and typology and variation Chapters in the second part offer broad comparative overviews of Bantu phonology morphology syntax semantics and pragmatics socio and applied linguistics before Parts III VII cover more specific topics in Bantu linguistics across a variety of subfields ranging from structural issues such as the augment and melodic tone to historical and sociolinguistic topics such as Bantu languages in the diaspora and language policy and standardization The chapters in the final part offer individual structural overviews of a range of languages from across the Bantu speaking area The book will be an essential resource for students and researchers specializing in the Bantu languages and for typologists and comparative linguists more broadly Salish Applicatives Kaoru Kiyosawa, Donna Gerdt, 2010-06-14 This book offers a comprehensive view of the morphology syntax and semantics of applicative constructions in Salish a language family of northwestern North America The historical development and discourse function of applicatives are elucidated and placed in typological perspective **United States Political Science Documents**, 1983
Arts & Humanities Citation Index, 1987 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world's leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals A Dictionary of Grammatical Terms in Linguistics R. L. Trask, 2003 **Glossary of Linguistic Terminology** Mario Andrew Pei, 1969 **Glossary of Linguistic Terminology** Mario Pei, 1966 **Modernisation of Luganda Terminology in the Field of Linguistics** Saudah Namyalo, 2019 This book is based on the observation that Luganda's current lexicon is inadequate when it comes to the expression of scientific concepts that exist in a wide range of specialised fields and forms of discourse The illogical

unsystematic and inconsistent approach to the development of Luganda linguistic terms currently in use indicates that the modernisation of Luganda scientific terminology is done without a model that guides a terminology elaborator's thinking in the process of creating terms. Based on this observation, this book provides a decisive examination of the history of terminology development in Luganda, especially in the field of Linguistics. It proceeds to develop a comprehensive model which guides the terminology elaborator's thinking and a style manual which provides a framework for a systematic expansion of the Luganda lexicon. The style manual is anchored on five pillars: Definition and analysis of a term, a standardised rendition of English expression elements into Luganda through the extrapolation of word forms and inventing new affixes, term formation mechanisms, the analogue rule of naming, and the evaluation and acceptability mechanism of a new term. Using both the model and the style manual, 300 linguistic terms in Luganda are coined and tested for acceptability. These terms constitute a potentially acceptable corpus of 300 Luganda linguistic terms which can be used in the teaching and learning of Luganda at both secondary and tertiary levels.
