Knowledge, Productivity, and Innovation in Nigeria Ismail Radwan, Giulia Pellegrini, 2010-03-09 Nigeria has a bold national vision of becoming one of the world s top 20 economies by 2020 However

despite being the 8th most populous country in the world it ranks 41st in terms of GDP and 161st in terms of GDP per capita Nigeria has long depended on oil for its exports and government revenues This dependence has led to rent seeking and a reluctance to examine potential avenues for economic diversification The authors of Knowledge Productivity and Innovation in Nigeria believe that the goal of becoming a top twenty economy can only be achieved if Nigeria makes the transition to a new economy rooted in the 21st century that harnesses the power of knowledge and avoids a static oil based growth strategy Knowledge has always been central to development but new technologies have made it globally accessible Countries such as the Republic of South Korea India and the United States that have exploited new technologies and know how have pushed their innovation and productivity frontiers Countries that have failed to do so risk remaining mired in poverty In order to achieve Vision 2020 Nigeria must move beyond the stop start patterns of oil based development that have characterized it since independence It must create a stable and prosperous economy based on a critical mass of knowledge workers Knowledge Productivity and Innovation in Nigeria examines how Nigeria can prepare for this century and where its leaders can focus to achieve their vision presenting the experiences of other countries from which Nigeria can learn Building Knowledge Economies ,2007 In many parts of the world knowledge is being put to work to accelerate and deepen the development process promoting innovation and helping to generate wealth and jobs This book discusses advanced development strategies that take into account education information and communication technology infrastructure innovation and the prerequisite economic and institutional regimes Foreign Actors' Influence on Azerbaijan's Energy Policy Tina Flegel,2015-10-03 The author traces several energy policy decisions taken between 2006 and 2013 in Azerbaijan to find out how international actors tried to influence policy making The book facilitates understanding of the political mechanisms threats and opportunities that characterize activities in Azerbaijan s energy sector illustrating strategic pitfalls and chances Based on a detailed country analysis and the in depth comparison of four policy cases the book deduces the political elite s rationale and its practical consequences for transnational relations It is relevant for scholars studying the political economy of rentier states and regimes in the authoritarian realm as well as for young strategists in organizations that conduct business in countries dominated by tight informal networks Underlying Dimensions of Knowledge Assessment Derek H.C. Chen,2016 The Knowledge Assessment Methodology KAM database measures variables that may be used to assess the readiness of countries for the knowledge economy and has many policy uses Formal analysis using KAM data is faced with the problem of which variables to choose and why Rather than make these decisions in an ad hoc manner the authors recommend factor analytic methods to distill the information contained in the many KAM variables into a smaller set of factors Their main objective is to quantify the factors for each country and to do so in a way that allows comparisons of the factor scores over time The authors investigate both principal components as well as true factor analytic methods and emphasize simple structures that help provide a clear political economic meaning of the factors but also allow comparisons

Dahlman, Anuja Utz, World Bank Institute,2005 India has made significant progress in its economic and social development in the past two decades with an impressive growth level which can be attributed to the far reaching reforms embarked on in 1991 and to opening the economy to global competition However in today's global knowledge economy India will need to use its knowledge capacity more effectively to achieve its development goals of raising the productivity of agriculture industry and services and reducing poverty levels This publication examines the progress made so far towards a knowledge economy and considers options to strengthen the economic and institutional regime to develop educated and skilled workers to create an efficient innovation system and build a dynamic information infrastructure

The World Bank Annual Report 2008 World Bank,2008 **Land Management Information Systems in the Knowledge Economy**,2007 The economies of most African countries rely heavily on agriculture and other land and land based activities such as tourism mining and livestock production Indeed these are the core activities through which African countries participate in the global economy Moreover land is key to food security and the social cultural needs of most communities in Africa It has also been established that the performance of most sectors of the economies of African countries is indeed tied to that of the land sector The management of this sector must therefore be accorded priority attention in all countries in order to unlock the overall performance of national economies This is best done through comprehensive land policies developed to address all the cross sectoral needs and the unique circumstances in each of the countries It is in response to this challenge that the African Union AU the African Development Bank AfDB and the Economic Commission for Africa ECA embarked on an exercise to develop a continental framework to guide land policy formulation and implementation in AU member States However the effective formulation and implementation of land policies can only be best done in circumstances where all the land information necessary is availed in a suitable timely and up to date form to enable expedient decision making by the policy planners in each of the sectors provided by publisher **Japan, Moving Toward a**
