

Language and Culture

Claire Kramsch

This paper surveys the research methods and approaches used in the multidisciplinary field of applied language studies or language education over the last forty years. Drawing on insights gained in psycho- and sociolinguistics, educational linguistics and linguistic anthropology with regard to language and culture, it is organized around five major questions that concern language educators. The first is: How is cultural meaning encoded in the linguistic sign? It discusses how the use of a symbolic system affects thought, how speakers of different languages think differently when speaking, and how speakers of different discourses (across language or in the same language) have different cultural worldviews. The second question is: How is cultural meaning expressed pragmatically through verbal action? It discusses the realization of speech acts across cultures, culturally-inflected conversation analysis, and the use of cultural frames. The third question is: How is culture co-constructed by participants in interaction? It discusses how applied linguistics has moved from a structuralist to a constructivist view of language and culture, from performance to performativity, and from a focus on culture to a focus on historicity and subjectivity. The fourth question is: How is research on language and culture affected by language technologies? The print culture of the book, the virtual culture of the Internet, the online culture of electronic exchanges all have their own ways of redrawing the boundaries of what may be said, written and done within a given discourse community. They are inextricably linked to issues of power and control. The last section explores the current methodological trends in the study of language and culture: the increased questioning and politicization of cultural reality, the increased interdisciplinary nature of research, the growing importance of reflexivity, and the noticeable convergence of intercultural communication studies and applied language studies in the study of language and culture.

Given the overwhelming diversity of areas covered by the field of research called “Applied Linguistics” (for a review, see Knapp 2014, de Bot in press) I will focus here on the area acknowledged by Knapp as “by far the biggest and best known”, namely language studies or language education. The publication in 1998 of the

Context and Culture in Language Teaching Claire Kramsch, 1993-06-17 This book takes cultural knowledge in language learning not only as a necessary aspect of communicative competence but as an educational objective in its own right If the aim of foreign language education is to foster cross cultural awareness and self realization language pedagogy needs to come to grips with a range of fundamental issues what do we mean by cultural context Can discourse practices be taught like rules of grammar What role does literature play in the development of second language literacy How can learners acquire both an insider s and an outsider s understanding of the foreign culture as expressed through its language By exploring these and other issues the book can help language teachers reflect on their profession and place it within its larger societal and educational context In turn they can help learners become not only skilful users of the language but also active architects of a new cross cultural world order
