A Cultural History of Dress and Fashion in the Modern Age Alexandra Palmer, 2018-11-01 Over the last century there has been a complete transformation of the fashion system The unitary top down fashion cycle has been replaced by the pulsations of multiple and simultaneous styles while the speed of global production and circulation has become ever faster and more complex Running in tandem the development of artificial fibres has revolutionized the composition of clothing and the increased focus on youth sexuality and the body has radically changed its design From the 1920s flapper dress to debates over the burkini fashion has continued to be deeply involved in society's larger issues Drawing on a wealth of visual textual and object sources and illustrated with 100 images *A Cultural History of Dress and Fashion in the Modern Age* presents essays on textiles production and distribution the body belief gender and sexuality status ethnicity and visual and literary representations to illustrate the diversity and cultural significance of dress and fashion in the period *Corporate*

Innovation Strategies Nacer Gasmi, 2021-03-03 Corporate social responsibility CSR is simply the maximization of a company's value over time undertaken because in the long run social and environmental problems ultimately become financial problems The justification for CSR is therefore associated with representing the nature and role of the company as well as its purpose Companies therefore regard CSR as a strategic investment that is part of a proactive resilient inclusive approach based on the creation of shared value This approach is capable of reducing negative societal impacts of their activities or inducing positive impacts if they sustain a hybrid culture all the while improving their competitive advantage This book presents a theoretical development that analyzes the challenges of CSR strategies based on the creation of shared value Two case studies are presented analyzing the different forms of social innovation strategies capable of inducing this shared value creation , **The Power of Imagination** Xavier Pavie, 2025-07-11 This book provides an overview of imagination and its role for survival in a complex high intensity environment More than this this book aims ambitiously to inspire imagination It establishes that imagination is neither abstract nor frivolous but a technique a skill and a discipline that one must embrace to facilitate the transformation of both society and oneself Whether facing contemporary challenges like climate change social and political crises or grappling with the complexities posed by artificial intelligence machine learning or transhumanism imagination seems to be what is lacking in order both to endure and to build Often reduced to the realm of artists imagination is a unique value added by humankind one that can envision a way of creating new worlds In this book the imagination becomes a spiritual exercise aimed at rethinking our ways of life in order to establish both a new construction of oneself and society Researchers and general readers alike will find much in this call to imagine how other worlds might be possible The Megalithic Architectures of Europe Luc Laporte, Chris Scarre, 2015-12-31 Megalithic monuments are among the most striking remains of the Neolithic period of northern and western Europe and are scattered across landscapes from Pomerania to Portugal Antiquarians and archaeologists early recognized the family resemblance of the different groups of

tombs attributing them to maritime peoples moving along the western seaways More recent research sees them rather as the product of established early farming communities in their individual regions Yet the diversity of the tombs their chronologies and their varied cultural contexts complicates any straightforward understanding of their origins and distribution Megalithic Architectures provides new insight by focusing on the construction and design of European megalithic tombs on the tomb as an architectural project It shows how much is to be learned from detailed attention to the stages and the techniques through which tombs were built modified and enlarged and often intentionally dismantled or decommissioned The large slabs that were employed often unshaped may suggest an opportunistic approach by the Neolithic builders but this was clearly far from the case Each building project was unique and detailed study of individual sites exposes the way in which tombs were built as architectural social and symbolic undertakings Alongside the manner in which the materials were used it reveals a store of knowledge that sometimes differed considerably from one structure to another even between contemporary monuments within a single region The volume brings together regional specialists from Scandinavia Germany Britain France Belgium and Iberia to offer a series of uniquely authoritative studies Results of recent fieldwork are fully incorporated and much of the material is published here for the first time in English It provides an invaluable overview of the current state of research on European megalithic tombs

Society 5.0 Bruno Salgues, 2018-08-21 Following the rapid development of connected technologies which are now highly sophisticated and spread across the globe Society 5.0 has emerged and brought with it a dramatic societal shift In 1998 Kodak the world leader in photographic film had 170 000 employees It thus seemed unthinkable that just 3 years later the majority of people would stop taking photographs to paper film and that Kodak would have disappeared These are the stakes of this new society that is taking shape This book which does not seek to critique current politics management or marketing literature aims to fight against the excesses of this often misunderstood Society 5.0 and to present the ideas and associated technologies that comprise it all working towards societal improvement Among these technologies artificial intelligence robotics digital platforms and 3D printing are undoubtedly the most important and thus receive the greatest focus

Embarrassment of Product Choices 1 Michel Millot, 2018-12-18 When there are too many choices there is no choice The choices are entangled in a maze of rather confused possibilities They go through many nebulous paths Doubt hesitation indecision become the only resolutions possible Choosing is the anxiety of being wrong The brand the quality price ratio the aesthetics give confidence but often with naivety There is a gap between the reality of the qualities of the products and the perception of the customer These are prejudices illusions a lack of knowledge Generally speaking is the consumer client able to appreciate by sight by touch or even by a brief trial of operation all the strengths and weaknesses a lot of products Market value dominates the use value Marketing will discover that we must no longer confuse the consumer the customer and the user The economic system only works because consumers are in the opacity of their choices The search for technical prowess and above all market value has dominated the search for value in use

no longer set by elites alone but come from the street and from countercultures and the business of fashion has transformed into a global enterprise
