

## Lab 4: Combining Forces

### Group Members

#### Objective

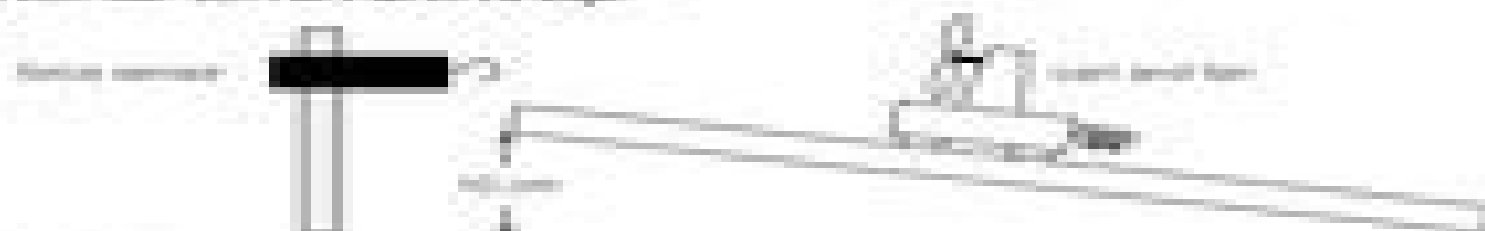

The purpose of this lab is to look at what happens when multiple forces act on an object and how they affect the motion of that object.

#### Equipment

Force sensor, cart and track with pulley, fan

#### Activity 1: One Force

Set up the track so that one end is about 10 cm above the other. Mount the force sensor using a force clamp. Mount the fan on top of the cart (preferably the front) so that the fan blows the cart away from you. (Don't let a fan off the edge.)

#### Questions

1. Released with the fan off, what is the direction of the acceleration? Sketch the acceleration vector in the following diagram. (The dot is the cart. The reference direction for is the direction down the ramp.)

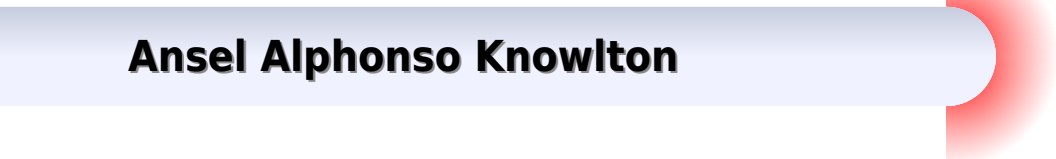

2. Which direction is the fan force?

3. What force is the net force that acts on other objects, what force goes into the sum for the net force? For this entire lab, assume that there is no friction.
