Bazerman, Don A. Moore, 2014-04-17 Law and Corporate Finance Frank B. Cross, Robert A. Prentice, 2007-01-01 The authors examine the role of the law in developing large financial markets necessary for national economic success They discuss the basic foundational law of contracts property and tort corporate law and securities law providing both a broad theoretical and empirical case for its value in financial markets **Think Again** Sydney Finkelstein, Jo Whitehead, Andrew Campbell, 2009-02-03 Why do smart and experienced leaders make flawed even catastrophic decisions Why do people keep believing they have made the right choice even with the disastrous result staring them in the face And how can you be sure you re making the right decision without the benefit of hindsight Sydney Finkelstein Jo Whitehead and Andrew Campbell show how the usually beneficial processes of the human mind can become traps when we face big decisions The authors show how the shortcuts our brains have learned to take over millennia of evolution can derail our decision making Think Again offers a powerful model for making better decisions

describing the key red flags to watch for and detailing the decision making safeguards we need Using examples from business politics and history Think Again deconstructs bad decisions as they unfolded in real time to show how you can avoid the same fate *Antitrust Law Journal* ,1986 The Politics of Knowledge Richard K. Laird,2019-05-03 Whether or not the U S is in decline can be debated but there is evidence that its political system is becoming less able to solve major problems This is in part because loyalty to a belief or an ideology may be taking priority over learning how to understand the problems This work attempts to revitalize the importance of learnability by reviewing some fundamentals of who we are how the system works and why learning is difficult Humans driven by opinions and perceptions tend to discount politics similar to the way they might discount science yet it was the study of science and politics that brought much of mankind to remarkably higher standards of living Government and the economic system it implemented was initially designed for the purpose of channeling self interests into public benefits Understanding what an inclusive political culture is or why there is a Constitution for example could be useful toward restoring the credibility of our central political organization the core of society s stability and development We are losing respect for our government s decision making ability but in a democracy citizens must be held more accountable for who their government is The hypothesis is that if more humans are more learnable we will increase the possibilities for finding the best solutions to big problems *Scaling Up Excellence* Robert I. Sutton,Huggy Rao,2014-02-04 Wall Street Journal Bestseller The pick of 2014 s management books Andrew Hill Financial Times One of the top business books of the year Harvey Schacter The Globe and Mail Bestselling author Robert Sutton and Stanford colleague Huggy Rao tackle a challenge that determines every organization s success how to scale up farther faster and more effectively as an organization grows Sutton and Rao have devoted much of the last decade to uncovering what it takes to build and uncover pockets of exemplary performance to help spread them and to keep recharging organizations with ever better work practices Drawing on inside accounts and case studies and academic research from a wealth of industries including start ups pharmaceuticals airlines retail financial services high tech education non profits government and healthcare Sutton and Rao identify the key scaling challenges that confront every organization They tackle the difficult trade offs that organizations must make between whether to encourage individualized approaches tailored to local needs or to replicate the same practices and customs as an organization or program expands They reveal how the best leaders and teams develop spread and instill the right mindsets in their people rather than ruining or watering down the very things that have fueled successful growth in the past They unpack the principles that help to cascade excellence throughout an organization as well as show how to eliminate destructive beliefs and behaviors that will hold them back *Scaling Up Excellence* is the first major business book devoted to this universal and vexing challenge and it is destined to become the standard bearer in the field Beneath the surface: Intelligence Preparation of the Battlespace for Counterterrorism ,2004 This book presents the deep subject matter understanding gained by a mid career U S Air Force officer who as a Research Fellow engaged in a year

Hard Facts, Dangerous Half-Truths, and Total Nonsense Jeffrey Pfeffer, Robert I. Sutton, 2006-02-14 The best organizations have the best talent Financial incentives drive company performance Firms must change or die Popular axioms like these drive business decisions every day Yet too much common management wisdom isn't wise at all but instead flawed knowledge based on best practices that are actually poor incomplete or outright obsolete Worse legions of managers use this dubious knowledge to make decisions that are hazardous to organizational health Jeffrey Pfeffer and Robert I Sutton show how companies can bolster performance and trump the competition through evidence based management an approach to decision making and action that is driven by hard facts rather than half truths or hype This book guides managers in using this approach to dismantle six widely held but ultimately flawed management beliefs in core areas

including leadership strategy change talent financial incentives and work life balance The authors show managers how to find and apply the best practices for their companies rather than blindly copy what seems to have worked elsewhere This practical and candid book challenges leaders to commit to evidence based management as a way of organizational life and shows how to finally turn this common sense into common practice Wilful Blindness Margaret Heffernan,2011-02-03 Fully revised and updated since its first publication in 2011 to encompass further appalling instances of wilful blindness Grenfell Tower Carillion Harvey Weinstein Windrush and many more Entertaining and compellingly argued Sunday Times A tour de force of brilliant insights Philip Zimbardo A polemic against the dangers of docility and groupthink in every walk of life Books of the Year Financial Times Writing in clear flowing prose Heffernan draws on psychological and neurological studies and interviews with executives whistleblowers and white collar criminals New York Times An engaging read packed with cautionary tales Heffernan shows why we close our eyes to facts that threaten our families our livelihood and our self image and even better she points the way out of the darkness Daniel H Pink author of Drive and A Whole New Mind Why after every major accident and blunder do we look back and ask how could we have been so blind Why do some people see what others don't And how can we change Drawing on studies by psychologists and neuroscientists and from interviews with business leaders whistle blowers and white collar criminals distinguished businesswoman and writer Margaret Heffernan examines the phenomenon of wilful blindness exploring the reasons that individuals and groups are blind to impending personal tragedies corporate collapses engineering failures even crimes against humanity We turn a blind eye in order to feel safe to avoid conflict to reduce anxiety and to protect prestige It makes us feel good at first with consequences we don't see But greater understanding leads to solutions and Heffernan shows how by challenging our biases encouraging debate discouraging conformity and not backing away from difficult or complicated problems we can be more mindful of what's going on around us and be proactive instead of reactive **Willful Blindness** Margaret Heffernan,2011-03-01 A provocative analysis of the human tendency towards selective ignorance assesses the impact of the phenomenon on private and working lives as well as within governments and organizations to consider why people may prefer ignorance and have different comfort levels By the author of The Naked Truth 35 000 first printing **Standing Room Only** J.
