

GASES, LIQUIDS, AND SOLIDS

- Atoms, molecules, and/or ions are the building blocks of gases, liquids, and solids, although their behaviour vary between the three phases. The variations at the microscopic level are seen in the following figure.

What are liquid, solid, and gas?

- Solid matter maintains a constant volume and shape, liquid matter conforms to the shape of its container while just slightly changing its volume, and gas material expands to take up the volume and shape of its container.

Which three states of matter are there?

- Matter exists in three different states: solid, liquid, and gas. By examining the configuration of their particles, it is possible to understand why they have various qualities. Theoretically, at this temperature, particles move slowly and have the least amount of energy
