Though the lab manual is designed to support the textbook by the same name, it can effectively supplement other foundational textbooks within the discipline. The activities can be performed in either laboratory or non-laboratory environments. They do not require the use of special reagents or supplies, testing kits, or safety equipment. Instead, the manual utilizes sticky easel pads, markers, and crayons, rendering the activities accessible, affordable, and fun. Each activity is self-explanatory and easy to understand, encouraging students to dive in. Additionally, the pages are easy to tear out and can be used as individual pre lab and lab team worksheets. For the second edition, many of the labs have been reordered, and some have been renamed to reflect more specific functions and aspects of the bodily systems. Additionally, a few of the original labs have been split into separate labs to allow for greater exploration of specific topics, e.g., the CVS.
