The Language of Global Success Tsedal Neeley, 2017-08-22 For nearly three decades English has been the lingua franca of cross-border organizations yet studies on corporate language strategies and their importance for globalization have been scarce In The Language of Global Success Tsedal Neeley provides an in-depth look at a single organization the high-tech giant Rakuten in the five years following its English lingua franca mandate Neeley's behind-the-scenes account explores how language shapes the ways in which employees who work in global organizations communicate and negotiate linguistic and cultural differences Drawing on 650 interviews conducted across Rakuten's locations in Brazil France Germany Indonesia Japan Taiwan Thailand and the United States Neeley argues that an organization's lingua franca is the catalyst by which all employees become some kind of expat someone detached from their mother tongue or home culture Through her unfettered access to the inner workings of Rakuten she reveals three distinct social groups linguistic expats who live in their home country yet have to give up their native language in the workplace cultural expats or native speakers of the lingua franca who struggle with organizational values that are more easily transmitted after language barriers are removed and finally linguistic cultural expats who while native to neither the lingua franca nor the organization's home culture surprisingly have the easiest time adjusting to language changes Neeley demonstrates that language can serve as the conduit for an unfamiliar culture often in unexpected ways and that there are lessons to be learned for all global companies as they confront language and culture challenges Examining the strategic use of language by one international corporation The Language of Global Success uncovers how all organizations might integrate language effectively to tap into the promise of globalization

Language and Globalization Maryam Borjian, 2017 Questions for Discussion Author Profile References Index , *The Evolution of English Language Learners in Japan* Yoko Kobayashi, 2018-01-19 This book seeks a better understanding of the sociocultural and ideological factors that influence English study in Japan and study abroad contexts such as university bound high schools, female dominant English classes at college, ESL schools in Canada and private or university affiliated ESL programs in Singapore and Malaysia. The discussion is based not only on data garnered from Japanese EFL learners and Japanese overseas educators but also on official English language policies and commercial magazine discourses about English study for Japanese people. The book addresses seemingly incompatible themes that are either entrenched in or beyond Japan's EFL context such as Japan's decades long poorly performing English education vs its equally long lived status as an economic power, Japanese English learners' preference for native English speakers' norms in at home Japanese EFL contexts vs their friendship with other Asian students in western study abroad contexts, Japanese female students' dream of using English to further their careers vs Japanese working women's English study for self enrichment, Japanese society's obsession with globalization through English study vs the Japanese economy sustained by monolingual Japanese businessmen, Japanese business magazines' frequent cover issues on global business English study vs Japanese working women's magazines' less frequent and markedly feminized discourses about English study. *Globalization of Language and Real-world Usage* Rebeccah C.
