Leadership and Organisational Effectiveness Post-COVID-19 Okechukwu E. Amah,Marvel Ogah,2023-06-10 This book considers the idea that existing

leadership theories have arisen as a result of significant disruption in work structure. The authors argue that the Covid 19 pandemic provided such a disruption and an opportunity to reconceptualise leadership. In order to capture this opportunity and conceptualise new leadership theories, it is first necessary to understand what happened in the past during the pandemic and examine the future of work. Addressing three critical issues in leadership, the authors firstly present a framework that helps us understand and enact leadership in the new normal. Parts 1 and 2 of the book address the past and current forms of leadership in the context of COVID 19. The book goes on to consider the lessons learned from COVID 19 in the context of the U N Sustainability Development Goals (SDGs). The targets of SDGs 7-17 refer to the need for organisations to operate responsibly; they call for organisations to review their operations processes and to define effective performance using triple bottom line measures comprising economic, social and environmental measures. Since leadership plays a significant role in achieving these goals, the book includes chapters on efficiency in process design and operation, definition and implementation of the triple bottom line measures and ethical behaviours. Finally, the book explores how the current process of leadership development falls short in today's context and calls for the need to develop effective leadership mindsets.

Organizational Excellence Shyama Prasad Mukherjee, 2025-08-26. This book discusses the multifaceted nature of organizational excellence and proceeds to consider the roles played by data technological advances leading to innovation and value-based leadership in guiding an organization in its journey towards excellence.
