Developing Second-language Skills Kenneth Chastain, 1988 **Developing Second-language Skills** Kenneth Chastain, 1976 *Contemporary ELT Strategies in Engineering Pedagogy* S. Mekala, Geetha R, 2022-03-17 This book explores innovative pedagogical practices and teaching and learning strategies in the engineering curriculum for empowered learning. It highlights the urgency for developing specific skill sets among students that meet the current market recruitment needs. The authors present a detailed framework for fostering a higher level of competence in students especially in their communication skills, their knowledge of media and technology tools and their leadership skills. The book offers examples of new and effective teaching strategies including cognitive, metacognitive and socio-affective strategies which align well with the existing and evolving technical curriculum. The book will be of interest to teachers, students and researchers of education, engineering and higher education. It will also be useful for English language teachers, educators and curriculum developers.

Fundamental Concepts of Language Teaching H. H. Stern, 1983-03-24 Professor Stern puts applied linguistics research into its historical and interdisciplinary perspective. He gives an authoritative survey of past developments worldwide and establishes a set of guidelines for the future. There are six parts: Clearing the Ground, Historical Perspectives, Concepts of Language, Concepts of Society, Concepts of Language Learning and Concepts of Language Teaching. *The Second Time Around* □ *Minimalism and L2 Acquisition* Julia Herschensohn, 2000-02-15 Linking recent advances in theoretical syntax and empirical research in language development, the book claims that second language acquisition is not totally distinct from first language acquisition but rather is a replay, a relearning of language. It argues that Universal Grammar is a template guiding acquisition of L1 while constraining acquisition of L2. Assuming that a syntactic distinction is crucial for language and its acquisition is the division between lexical and functional categories, it argues that the key to L2 as well as L1 acquisition of syntax is the mastery of morphological features and their linking to functional categories. It thus supports the availability of UG to the second language learner and the minimalist claim that cross-linguistic variation is morpho-lexical. Constructionism, the hypothesis of L2A proposed in this account, argues for a period of feature underspecification after loss of the L1 value followed by a progressive building of the L2 value through specific constructions. **Assessing Grammar** James E.

Purpura, 2004-11-18 *Assessing Grammar* provides essential reading for teachers who need to evaluate their students' grammar. **CONTEMPORARY RESEARCH ON LANGUAGE STUDIES** Dr. Öznur ATAŞ AKDEMİR, *Contemporary Research on Language Studies* is a collection of current research and review papers on language teaching/learning studies. The book compiles research and review studies on language testing, vocabulary teaching, authentic materials in ELT, L2 writing, distance learning, teaching practices and so on. MALL Shanlax Publications is proud of presenting state-of-the-art research on language studies. **The Foreign Language Educator in Society** Timothy G. Reagan, Terry A. Osborn, 2001-12-01 This text brings together two significant domains of educational practice: foreign language education and critical pedagogy, linking

them in a way that can help foreign language educators develop a critical awareness of the nature purposes and challenges facing foreign language pedagogy Unique among texts in the field this is the first to deal explicitly with the social political ideological and economic aspects of language language learning and language teaching in our society and to connect the practice of foreign language education with these critical and crucial aspects of language and language use The Foreign Language Educator in Society Toward A Critical Pedagogy emphasizes what teachers and future teachers of foreign languages in this country ought to know and understand about language language attitudes practices rights and policy and related issues focuses on helping students to move beyond pragmatic pedagogical concerns to the social and political concerns relevant to their teaching and provides students with the opportunity to develop critical perspectives on the central facets of the language education process Intended for foreign language education programs at both basic and advanced levels as well as courses in critical pedagogy critical language awareness sociolinguistics and social and cultural foundations of education the text provides helpful pedagogical features to direct the reader in applying the content of each chapter to his or her own context

Innovative Learning Models for Prisoners Francesca Torlone, Marios Vryonides, 2016-05-17 Prison education should be a top priority issue in most societies Prison conditions must not infringe human rights and dignity and must offer meaningful treatment programmes in order to support inmates in their rehabilitation and reintegration in society The use of ICTs within a penitentiary context plays a crucial role in that The present Volume looks at the learning potential in prisons and reports on innovative e learning pathways for basic skills education as designed and tested in Cyprus Greece Italy and Romania Research investigated on what counts as educational in such a complex context and how to combine relevant pieces in a learning mosaic the broad range of any learning opportunity across it This Volume argues that such an approach may be adopted in a wider European perspective within the frame of dynamic security
