The Comprehensive Guide to Science and Faith William A. Dembski, Casey Luskin, Joseph M. Holden, 2021-10-05 Science and Faith Can and Do Support Each Other Science and Christianity are often presented as opposites when in fact the order of the universe and the complexity of life powerfully testify to intelligent design With this comprehensive resource that includes the latest research you ll witness how the findings of scientists provide compelling reasons to acknowledge the mind and presence of a creator Featuring more than 45 entries by top caliber experts you ll better understand how scientific concepts like intelligent design are supported by evidence the scientific findings that support the history and accounts found in the Bible the biases that lead to scientific information being presented as a challenge rather than a complement to Christianity Whether you re looking for answers to your own questions or seeking to explain the case for intelligent design to others The Comprehensive Guide to Science and Faith is an invaluable apologetic tool that will help you explore and analyze the relevant facts research and theories in light of biblical truth

Changing Life Peter J. Taylor, Saul E. Halfon, Paul N. Edwards, 1997 In laboratories all over the world life even the idea of life is changing And with these changes whether they result in square tomatoes or cyborgs come transformations in our social order sometimes welcome sometimes troubling Changing Life offers a close look at how the mutable forms and concepts of life link the processes of science to those of information finance and commodities These essays about planetary management and genome sequencing ecologies and cyborgs address actual and imagined transformations at the center and at the margins of transnational relations during the post Cold War era and in times to come

Pulse Robert Frenay, 2006 Pulse charts the growing power of a new biology of human systems and machines that work like living things Written in simple prose Pulse describes emotional computers ships that swim like fish hard soft and wet artificial life farms that grow like prairies technological ecosystems money that mimics the energy flow in nature evolution at warp speed and a great deal more And these are not blue sky dreams they are even now leaving labs and entering our daily lives Pulse is an original work offering thoughtful conclusions about the promise and dangers of our transformation as we move into the next great phase of human cultural evolution
