alternative to education in academic departments that had once openly ridiculed it But pedagogy's fractured meaning cannot be explained away as a matter of technical jargon or political fashion To do so conceals the power struggles between scholars and professional teachers that continue to this day In this unusual and unprecedented volume Salvatori uses pedagogy as a key term for understanding how American education evolved in the early twentieth century She traces its contested meaning in a fascinating group of documents dictionary and encyclopedia definitions early treatises on pedagogy professional literature and debates about the place of pedagogy and offers a critical framework for reading them The past that these documents uncover Salvatori hopes will incite sustained and responsible critical investigation of current institutional political and theoretical interests that by continuing to construct pedagogy as essentially practical a theoretical and anti intellectual simultaneously justify its ancillary status to theory within the academy

**Reproducing the State** Jacqueline Stevens, 2020-12-08 People are said to acquire their affiliations of ethnicity race and sex at birth Hence these affiliations have long been understood to be natural independent of the ability of political societies to define who we are Reproducing the State vigorously challenges the conventional view as well as post structuralist scholarship that minimizes state power Jacqueline Stevens examines birth based theories of membership and group affiliations in political societies ranging from the Athenian polis to tribes of Australia to the French republic to the contemporary United States The book details how political societies determine the kinship rules that are used to reproduce political societies Stevens analyzes the ways that ancestral and territorial birth rules for membership in political societies pattern other intergenerational affiliations She shows how the notion of ethnicity depends on the implicit or explicit invocation of a past present or future political society She also shows how geography is used to represent political regions including continents as the seemingly natural underpinning for racial taxonomies perpetuated through miscegenation laws and birth certificates And Stevens argues that sex differences are also constituted through membership practices of political societies In its chronological and disciplinary range Reproducing the State will reward the interest of scholars in many fields including anthropology history political science sociology women s studies race studies and ethnic studies
