SOM SOM,2021-07-20 Legendary architecture practice SOM presents 40 of their most transformative works in the sixth and latest volume SOM Works by Skidmore Owings Merrill 2009 2019 Skidmore Owings Merrill SOM is one of the most influential architecture studios in the world with a body of work that includes some of the most important buildings and urban designs of our time SOM Works by Skidmore Owings Merrill 2009 2019 is the sixth and latest volume in the series to cover every era of SOM s history from the iconic Modernist works of the 1950s to the projects of today Documenting SOM s global body of work which ranges from a prototype for a biophilic breathing wall to the new headquarters for NATO in Brussels SOM Works by Skidmore Owings Merrill 2009 2019 demonstrates how SOM has come to hold its unparalleled position as a steward of international architecture This new volume details SOM s approach to designing impactful complex projects in a globalized world an approach which marries a deep bench of global expertise with a commitment to honoring culture and people in the communities where SOM works In this volume explore SOM s mission to address the most urgent challenge of our time climate change Working in pursuit of a zero carbon built world SOM s designers are pioneering new approaches to adaptive reuse cultivating emerging technologies including machine learning inventing new tools to optimize building performance and beyond Organized chronologically the monograph encompasses SOM s most significant projects of the past decade across all building types and locations highlighting the studio s unique ability to design and execute complex technical and efficient structures The roster includes Burj Khalifa the tallest building in the world Manhattan Loft Gardens a new vertical community in London the twisting Ningbo Bank of China headquarters the floating cube new Federal Courthouse in Los Angeles the master plan for the Cornell Tech Campus on Roosevelt Island the reimaged Strand Theatre in San Francisco Chicago s Optimo Hat Company Headquarters Denver Union Station and of course One World Trade Center Through in depth essays architecture writer and critic Sam Lubell dives into SOM s radically rigorous approach to design in today s complex world exploring the unique ideas cultivated within the studio and how those ideas are transformed into transformative spaces across the globe As with the previous five volumes in the series renowned design studio Pentagram led the book s design in collaboration with SOM Featuring 500 images the book includes thorough profiles and never before published photographs plans and drawings of the studio s most recent works *States of Innovation* James D. G. Wood,2025-12-11 Challenging the notion of the US as a singular market driven economy this book reveals the critical role that both the Federal and State governments play in shaping growth and how individual states vary significantly in fostering innovation and high value industries **A New Vision for Center-Based Engineering Research** National Academies of Sciences, Engineering, and Medicine,National Academy of Engineering,Division on Engineering and Physical Sciences,National Materials and Manufacturing Board,Committee on a Vision for the Future of Center-Based Multidisciplinary Engineering Research,2017-08-18 The future security economic growth and competitiveness of the United

States depend on its capacity to innovate Major sources of innovative capacity are the new knowledge and trained students generated by U S research universities However many of the complex technical and societal problems the United States faces cannot be addressed by the traditional model of individual university research groups headed by a single principal investigator Instead they can only be solved if researchers from multiple institutions and with diverse expertise combine their efforts The National Science Foundation NSF among other federal agencies began to explore the potential of such center scale research programs in the 1970s and 1980s in many ways the NSF Engineering Research Center ERC program is its flagship program in this regard The ERCs are interdisciplinary multi institutional centers that join academia industry and government in partnership to produce transformational engineered systems and engineering graduates who are adept at innovation and primed for leadership in the global economy To ensure that the ERCs continue to be a source of innovation economic development and educational excellence A New Vision for Center Based Engineering Research explores the future of center based engineering research the skills needed for effective center leadership and opportunities to enhance engineering education through the centers Advanced Manufacturing William B. How to rethink innovation and revitalize America s declining manufacturing sector by encouraging advanced manufacturing bringing innovative technologies into the production process The United States lost almost one third of its manufacturing jobs between 2000 and 2010 As higher paying manufacturing jobs are replaced by lower paying service jobs income inequality has been approaching third world levels In particular between 1990 and 2013 the median income of men without high school diplomas fell by an astonishing 20% between 1990 and 2013 and that of men with high school diplomas or some college fell by a painful 13% Innovation has been left largely to software and IT startups and increasingly U S firms operate on a system of innovate here produce there leaving the manufacturing sector behind In this book William Bonvillian and Peter Singer explore how to rethink innovation and revitalize America s declining manufacturing sector They argue that advanced manufacturing which employs such innovative technologies as 3 D printing advanced material photonics and robotics in the production process is the key Bonvillian and Singer discuss transformative new production paradigms that could drive up efficiency and drive down costs describe the new processes and business models that must accompany them and explore alternative funding methods for startups that must manufacture They examine the varied attitudes of mainstream economics toward manufacturing the post Great Recession policy focus on advanced manufacturing and lessons from the new advanced manufacturing institutes They consider the problem of startup scaleup possible new models for training workers and the role of manufacturing in addressing secular stagnation in innovation growth the middle classes productivity rates and related investment As recent political turmoil shows the stakes could not be higher **The Next Production Revolution Implications for Governments and Business** OECD, 2017-05-10 This publication examines the opportunities and challenges for business and government associated with technologies bringing about the next production

Architecting Robust Co-Design of Materials, Products, and Manufacturing Processes Anand Balu Nellippallil,Janet K. Allen,B. P. Gautham,Amarendra K. Singh,Farrokh Mistree,2020-06-13 This book explores systems based co design introducing a Decision Based Co Design DBCD approach for the co design of materials products and processes In recent years there have been significant advances in modeling and simulation of material behavior from the smallest atomic scale to the macro scale However the uncertainties associated with these approaches and models across different scales need to be addressed to enable decision making resulting in designs that are robust that is relatively insensitive to uncertainties An approach that facilitates co design is needed across material product design and manufacturing processes This book describes a cloud based platform to support decisions in the design of engineered systems CB PDSIDES which feature an architecture that promotes co design through the servitization of decision making knowledge capture and use templates that allow previous solutions to be reused Placing the platform in the cloud aids mass collaboration and open innovation A valuable reference resource reference on all areas related to the design of materials products and processes the book appeals to material scientists design engineers and all those involved in the emerging interdisciplinary field of integrated computational materials engineering ICME

Energy Efficiency: Innovations: Driving Prosperity, Slashing Emissions Henry Kelly,2020-11-06 Energy efficiency touches all parts of the economy and lies at the heart of all plausible strategies for addressing climate change A fascinating range of new technologies and new business models have emerged in the past few years and are rapidly reshaping the field and driving efficiency improvements many of them completely unexpected This book provides a fresh look at energy efficiency written in a way that can be interesting to experts and serve as an entry point for novices With chapters written by recognized experts in their fields of expertise the book provides

readers with a clear perspective on the state of the art developments of both new technologies and new approaches to system design and operations in buildings industry transportation and urban design Strategies for electrification and optimization based on data and powerful algorithms are also explored in depth The discussion includes new mobility systems smart buildings reimagined industrial processes new materials and smart grid integration Related Link s [Digital @ Scale](#) Anand Swaminathan,Jürgen Meffert,2017-06-02 A blueprint for reinventing the core of your business Value in the next phase of the digital era will go to those companies that don t just try digital but also scale it Digital Scale examines what it takes for companies to break through the gravitational pull of their legacy organizations and capture the full value of digital Digging into more than fifty detailed case studies and years of McKinsey experience and data the authors along with a group of expert contributors show how companies can move beyond incremental change to transform the business where the greatest value is generated at its core The authors provide practical insights into the three pillars of digital transformations that successfully scale reinventing the business model building out a business architecture from the customer back into the organization and establishing an amoeba IT and organizational foundation that learns and evolves This is the ideal guide for all leaders who recognize the power and promise of a digital transformation
