engines in the competition The fourth paper examines specific power densities and therefore the level of sophistication and costs of MotoGP 800 cm³ engines This paper shows the performance of these as well as the 1000cc SuperBike engines The fifth paper presents four engine concepts including one for a MotoGP Superbike with 2 and 3 cylinders The sixth paper compares 3 and 4 in line V4 V5 and V6 layouts through 1 D engine simulations The seventh paper considers the actual operation of 800cc MotoGP engines on the race track where the percentage of the duration in fully open throttle is less than 20% of the race but the partial throttle is used for as much as 80% of the race The final paper in the compendium reports on the Honda oval piston engine concept
