why our culture is so fascinated by the apocalypse It ultimately argues that while many see the post apocalyptic genre as reflective of contemporary fears it has actually co evolved with the transformations in our mediascape to become a perfect vehicle for transmedia storytelling The post apocalyptic offers audiences a portal to a fantasy world that is at once strange and familiar offers a high degree of internal consistency and completeness and allows for a diversity of stories by different creative teams in the same story world With case studies of franchises such as The Walking Dead and The Terminator

Transmedia Storytelling and the Apocalypse offers analyses of how shifts in media industries and reception cultures have promoted a new kind of open world building narrative across film television video games and print For transmedia scholars and fans of the genre this book shows how the end of the world is really just the beginning *Crash Course in Gaming*

Rediscovering French Science-Fiction in Literature, Film and Comics Philippe Mather, Sylvain Rheault, 2016-02-29 French science fiction SF is as old as the French language Cyrano de Bergerac wrote about a trip to the moon that was published back in 1657 as did Jules Verne in 1865 this time using hard scientific facts The first movie showing a trip to the moon was made by Georges Méliès in 1902 In the comics format Hergé had Tintin walk on the moon in 1954 15 years before Neil Armstrong These are just a few of the many unique French contributions to SF that rightly deserve to be better known One of the purposes of this collection is to introduce French SF to an English speaking audience Rediscovering French Science Fiction first revisits proto science fiction from authors like Cyrano de Bergerac and Jules Verne before delving into contemporary science fiction works from authors such as René Barjavel and Jacques Spitz A contribution from preeminent SF author Elisabeth Vonarburg from Québec helps to understand the constraints and advantages of writing SF in French A third section is devoted to French SF in movies and graphic novels media where French creators have been recognized worldwide This collection explores many aspects of French SF including the genre's deep roots in popular culture the influence of key

authors on its historical development and the form and function of science and fantasy as well as the impact of films and graphic novels on the public perception of the genre's nature The British and Irish Novel Since 1960 James Acheson, 1991-09-03 The essays in this collection survey the work of some of the most important British and Irish novelists of today They not only consider afresh the work of novelists who established their reputations before 1960 such as Doris Lessing and William Golding they also discuss the work of more recent novelists among them Kazuo Ishiguro Angela Carter and Graham Swift The contributors are drawn from various parts of the English speaking world and provide a variety of original perspectives on the novelists concerned **Religion, Magic, and Science in Early Modern Europe and America** Allison P. Coudert, 2011-10-17 This fascinating study looks at how the seemingly incompatible forces of science magic and religion came together in the 15th 16th and 17th centuries to form the foundations of modern culture As Religion Magic and Science in Early Modern Europe and America makes clear the early modern period was one of stark contrasts witch burnings and the brilliant mathematical physics of Isaac Newton John Locke's plea for tolerance and the palpable lack of it the richness of intellectual and artistic life and the poverty of material existence for all but a tiny percentage of the population Yet for all the poverty insecurity and superstition the period produced a stunning galaxy of writers artists philosophers and scientists This book looks at the conditions that fomented the emergence of such outstanding talent innovation and invention in the period 1450 to 1800 It examines the interaction between religion magic and science during that time the impossibility of clearly differentiating between the three and the impact of these forces on the geniuses who laid the foundation for modern science and culture **Annals of Glaciology** ,1980 *Best American Science Writing* ,2004 **Pompeii and Herculaneum** Marcel Brion, 1960 **Circulating Film Library Catalog** Museum of Modern Art (New York, N.Y.). Circulating Film Library, 1984 **Harper's** ,2002 Umetnost ,1968 **The ... Biennale of Sydney at the Art Gallery of New South Wales** ,2002 **The Biennale of Sydney** ,2002 The World May be Fantastic Ewen McDonald, 2002 Running from May 15 until July 14 2002 the Biennale of Sydney explores the way artists use narratives models fictions and fabrications to challenge and to change our interpretations of the world
