Multivariate Network Visualization Andreas Kerren, Helen Purchase, Matthew O. Ward, 2014-04-15 This book is the outcome of the Dagstuhl Seminar 13201 on Information Visualization Towards Multivariate Network Visualization held in Dagstuhl Castle Germany in May 2013 The goal of this Dagstuhl Seminar was to bring together theoreticians and practitioners from Information Visualization HCI and Graph Drawing with a special focus on multivariate network visualization i e on graphs where the nodes and or edges have additional multidimensional attributes The integration of multivariate data into complex networks and their visual analysis is one of the big challenges not only in visualization but also in many application areas Thus in order to support discussions related to the visualization of real world data also invited researchers from selected application areas especially bioinformatics social sciences and software engineering The unique Dagstuhl climate ensured an open and undisturbed atmosphere to discuss the state of the art new directions and open challenges of multivariate network visualization

Optics of the Human Eye David Atchison, 2023-03-31 This book describes the optical structure and optical properties of the human eye For ease of reference the most commonly useful topics are at the beginning and topics with narrower appeal are placed towards the end The book is divided into five sections covering Basic optical structure of the eye including the refracting components the pupil axes and simple models of the eye Image formation and refraction of the eye including refractive errors measurement and correction Interactions between light and the eye considering transmission reflection and scatter in the media and at the fundus Aberrations and retinal image quality Depth of field and age related changes in the optics of the eye There have been many developments in the field of visual optics since the first edition was published in 2000 There have been advances in instrumentation for imagery biometry and aberrations of the eye The refraction anomaly of myopia has increased in prevalence throughout the world and is getting increasing attention because of its association with ocular pathology in the middle and later years of life Ocular aberrations are now considered in terms of Zernike polynomials rather than Taylor polynomials Aberrations can be manipulated to better understand their effects on visual performance to improve imagery of the retina for the betterment of diagnosis of various ocular conditions and to treat the progression of myopia in children To deal with these developments the section on aberrations and retinal image quality has undergone considerable revision This book will be an invaluable purchase for all those with an interest in vision such as optometrists ophthalmologists vision scientists optical physics and student of visual optics An understanding of the optics of the human eye is particular important to designers of ophthalmic diagnostic equipment and visual optical systems such as telescopes

Information Science and Applications (ICISA) 2016 Kuinam J. Kim, Nikolai Joukov, 2016-02-15 This book contains selected papers from the 7th International Conference on Information Science and Applications ICISA 2016 and provides a snapshot of the latest issues encountered in technical convergence and convergences of security technology It explores how information science is core to most current research industrial and

commercial activities and consists of contributions covering topics including Ubiquitous Computing Networks and Information Systems Multimedia and Visualization Middleware and Operating Systems Security and Privacy Data Mining and Artificial Intelligence Software Engineering and Web Technology The contributions describe the most recent developments in information technology and ideas applications and problems related to technology convergence illustrated through case studies and reviews converging existing security techniques Through this volume readers will gain an understanding of the current state of the art information strategies and technologies of convergence security The intended readers are researchers in academia industry and other research institutes focusing on information science and technology

Optics in Our Time Mohammad D. Al-Amri, Mohamed El-Gomati, M. Suhail Zubairy, 2016-12-12 Light and light based technologies have played an important role in transforming our lives via scientific contributions spanned over thousands of years In this book we present a vast collection of articles on various aspects of light and its applications in the contemporary world at a popular or semi popular level These articles are written by the world authorities in their respective fields This is therefore a rare volume where the world experts have come together to present the developments in this most important field of science in an almost pedagogical manner This volume covers five aspects related to light The first presents two articles one on the history of the nature of light and the other on the scientific achievements of Ibn Haitham Alhazen who is broadly considered the father of modern optics These are then followed by an article on ultrafast phenomena and the invisible world The third part includes papers on specific sources of light the discoveries of which have revolutionized optical technologies in our lifetime They discuss the nature and the characteristics of lasers Solid state lighting based on the Light Emitting Diode LED technology and finally modern electron optics and its relationship to the Muslim golden age in science The book's fourth part discusses various applications of optics and light in today's world including biophotonics art optical communication nanotechnology the eye as an optical instrument remote sensing and optics in medicine In turn the last part focuses on quantum optics a modern field that grew out of the interaction of light and matter Topics addressed include atom optics slow stored and stationary light optical tests of the foundation of physics quantum mechanical properties of light fields carrying orbital angular momentum quantum communication and Wave Particle dualism in action

Dictionary of Visual Science and Related Clinical Terms Henry W. Hofstetter, 2000 This Dictionary of Visual Science and Related Clinical Terms has been completely updated to include more than 400 new terms on optics and refractive surgery It contains a convenient appendix on key therapeutic drugs listed by both generic and trade names to aid in the quick retrieval of information Emphasis is placed on succinct definition rather than on encyclopedic elaboration This solid reference has earned recognition among optometrists students paraoptometric assistants and opticians as a comprehensive listing of ophthalmic terms used in daily practice Included with the book is a CD ROM containing the entire text which provides easy searching and quick reference in a conveniently portable format A valuable resource that belongs in the library of all vision professionals

Definitions reflect the current state of optometric practice and new material has been added in the areas of optics and refractive surgery Contains handy conversion tables lists of abbreviations pediatric pharmaceutical rules for dosages vision therapy referral criteria and a new appendix on important therapeutic drugs

Architecture as a Performing Art Marcia Feuerstein, Gray Read, 2016-04-15 How do buildings act with people and among people in the performances of life This collection of essays reveals a deep alliance between architecture and the performing arts uncovering its roots in ancient stories and tracing a continuous tradition of thought that emerges in contemporary practice With fresh insight the authors ask how buildings perform with people as partners rather than how they look as formal compositions They focus on actions the door that offers the possibility of making a dramatic entrance the window that frames a scene and the city street that is transformed in carnival The essays also consider the design process as a performance improvised among many players and offer examples of recent practice that integrates theater and dance This collection advances architectural theory history and criticism by proposing the lens of performance as a way to engage the multiple roles that buildings can play without reducing them to functional categories By casting architecture as spatial action rather than as static form these essays open a promising avenue for future investigation For architects the essays propose integrating performance into design through playful explorations that can reveal intense relationships between people and place and among people in place Such practices develop an architectural imagination that intuitively asks How might people play out their stories in this place and How might this place spark new stories Questions such as these reside in the heart of all of the essays presented here Together they open a position in the intersection between everyday life and staged performance to rethink the role of architectural design

Frontiers in Visual Science Steven J. Cool, Earl L. Smith, 2013-06-05 The papers included in this volume were presented as a part of the dedication of a new clinical teaching research facility for the University of Houston College of Optometry March 27 31 1977 These papers were intended to cover the state of the art knowledge in all areas of visual system investigation While we may not have quite reached our goal of covering all areas the papers presented here cover a broad cross section of investigations in vision However without doubt the intention of state of the art coverage was achieved in all areas discussed From the beginning with the presentation of Nobel Laureate Ragnar Granit to the end with consideration of Vision Health Care Delivery Systems each speaker was thorough in treatment of his her subject From studies of the and of contact lenses through examination of crystalline lens function ocular pathologies and retina function the eye is very thoroughly considered Much of this volume covers material dealing with the process of vision after coding of information in the eye Psychophysical studies of vision compare and contrast with neurophysiological studies of visual function and a very thorough section on the development of visual system function should prove valuable to a wide cross section of teachers researchers and clinicians All in all the contents of this volume represent a vast array of knowledge about the visual system and this should be a valuable teaching research resource for many years

Women in Sensory

Neuroscience Elena Nava, Monica Gori, Alessia Tonelli, Maria Bianca Amadeo, 2023-08-24 At present less than 30% of researchers worldwide are women Long standing biases and gender stereotypes are discouraging girls and women from pursuing a career in science technology engineering and mathematics STEM research Science and gender equality are however essential to ensure sustainable development as highlighted by UNESCO Although underrepresented and often unacknowledged female researchers have been crucial to scientific advances In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue STEM careers Therefore the Sensory Neuroscience section is proud to shed a light on great female researchers and provide them with a platform to showcase their work and role in open science This editorial initiative of particular relevance led by Dr Monica Gori together with Dr Elena Nava Dr Alessia Tonelli and Dr Maria Bianca Amadeo highlights advances in the field of sensory neuroscience to further aid our empirical and theoretical understanding of human sensation and perception **Aging in**
