Sanjit Kumar Mitra, 2002 *Digital Signal Processing A Computer Based Approach* is intended for a two semester course on
digital signal processing for seniors or first year graduate students Based on user feedback a number of new topics have
been added to the second edition while some excess topics from the first edition have been removed The author has taken
great care to organize the chapters more logically by reordering the sections within chapters More worked out examples
have also been included The book contains more than 500 problems and 150 MATLAB exercises New topics in the second
edition include finite dimensional discrete time systems correlation of signals inverse systems system identification matched
filter design of analog and IIR digital highpass bandpass and bandstop filters more on FIR filters spectral analysis of random
signals and sparse antenna array design A corrected version of the main text is now packaged with *Digital Signal Processing*
Laboratory Using MATLAB which is intended for a computer based DSP laboratory course that supplements a lecture course
on *Digital Signal Processing* The lab book includes 11 laboratory exercises with each exercise containing a number of
projects to be carried out on a computer The book assumes that the reader has no background in MATLAB and teaches the
reader through tested programs in the first half of the book the basics of this powerful language in solving important
problems in signal processing In the second half of the book the student is asked to write the necessary MATLAB programs to
carry out the projects **Solutions Manual, Digital Signal Processing** William D. Stanley, Ronald W. Schaffer, 1975
