

Discourse, Identity, and Global Citizenship

MICHAEL KAULBERG

The concept of global citizenship has entered into the lexicon of diverse movements for peace and justice over the past decade. But what does it mean to be a “global citizen?” And how does this concept advance the goals of such movements? The Greek and Latin roots of the term citizen denote an inhabitant of a city, or a community, who possessed certain rights and privileges associated with membership in that community. Of course, many categories of people did not possess the rights and privileges of citizenship in the communities of Greek and Roman antiquity. Nonetheless, the concept of citizenship was a democratic ideal that expanded the boundaries of self-determination beyond the sphere of autocratic rulers. This is the difference between a citizen and a subject: a citizen is a participant in self-governance whereas a subject is not.

Today, the boundaries of citizenship have been expanded beyond the city-as-community to the nation-state-as-community. Legally, the term citizenship now denotes a constitutionally defined relationship between an individual and a nation-state, in which the individual receives a guarantee of certain civic rights in exchange for certain civic duties and responsibilities.

What does it mean, then, when we speak of “global citizenship?” Although global citizenship is not yet an accepted legal construct, the term is becoming a significant discursive construct that can play an important role in the creation of a more peaceful and just global order.

Discourse theory posits that human cultures and human consciousness are shaped, in part, by the patterned ways we think and talk together. The premise is simple: the patterned ways that we collectively think and talk—our discourses—influence our perceptions, our motivations, our actions, and even our construction of social institutions. In this sense, discourses are like the productive scaffolding, or matrix, of human culture and consciousness. Discourses help to structure our mental and social realities.

If we grow up immersed in racist or sexist discourses, for example, we are likely to perceive the world in those ways, we are likely to act

O'Byrne, 2004-11-23 The Dimensions of Global Citizenship takes issue with the assumption that ideas about global citizenship are merely Utopian ideals The author argues that far from being a modern phenomenon world citizenship has existed throughout history as a radical alternative to the inadequacies of the nation state system Only in the post war era has this ideal become politically meaningful This social transformation is illustrated by references to the activities of global social movements as well as those of individual citizens Global Citizenship, Common Wealth and Uncommon Citizenships , 2018-08-16 This set of essays critically analyze global citizenship by bringing together leading ideas about citizenship and the commons in this time that both needs and resists a global perspective on issues and relations Education plays a significant role in how we come to address these issues and this volume will contribute to ensuring that equity global citizenship and the common wealth provide platforms from which we might engage in transformational collective work The authors address the global significance of debates and struggles about belonging and abjection solidarity and rejection identification and othering as well as love and hate Global citizenship as a concept and a practice is now being met with a dangerous call for insularism and a protracted ethno nationalism based on global economic imperialism movements for white supremacy and miscegenation various forms of religious extremism and identity politics but which antithetically also comes from the anti globalization movement focused on building strong sustainable communities We see a taming of citizens that contributes to the taming of what we understand as the public sphere and the commons the places of cultural natural and intellectual resources that are shared and not privately owned The work of global citizenship education is distinguishable from the processes of a deadly globalization or destruction of the world that responds to the interlocking issues that make life on the planet precarious for human and non humans everywhere albeit an unequal precarity This book is an invitation into a conversation that explores and makes visible some of the hidden chasms of oppression and inequity in the world It is meant to provoke both argument and activism as we work to secure common spaces that are broadly life sustaining Contributors are Ali A Abdi Sung Kyung Ahn Chouaib El Bouhali Xochilt Hernandez Carrie Karsgaard Marlene McKay Michael O Sullivan Christina Palech Karen Pashby Karen J Pheasant Neganigwane

The Global Citizenship Nexus Debra D. Chapman,Tania Ruiz-Chapman,Peter Eglin,2020 In the spirit of Ivan Illich s 1968 speech To hell with good intentions the book takes aim at a ubiquitous form of

contemporary ideology namely the concept of global citizenship Its characteristic discourse can be found inhabiting a nexus of four complexes of ruling institutions namely universities with their international service learning the United Nations and allied international institutions bent on global citizenship education international non governmental organizations and foundations promoting social entrepreneurship and global corporations and their mouthpieces pitching corporate social responsibility and sustainable development The question is in the context of Northern or Western imperialism and US led neoliberal global corporate capitalism and the planetary Armageddon they are wringing what is the concept of global citizenship doing for these institutions The studies in the book put this question to each of these four institutional complexes from broadly political economic and post colonial premises focusing on the concept s discursive use against the background of the mounting production of the global non citizen as the global citizen s other Addressed to all users of the concept of global citizenship from university students and faculty in global studies to social entrepreneurs and United Nations bureaucrats the book s studies ultimately ask whether the idea helps or hinders the global quest for social and economic justice

Newing,2019-01-29 Over the past two decades two opposing currents have been building On the one hand a resurgence of jingoistic nationalism racial intolerance violent and distorted radicalized extremism Xenophobia and Islam phobia On the other hand there is a growing recognition that in a globalized world of instant information and social communication old prejudices and outdated nationalistic sentiments must give way to a new era of pluralism and well informed global citizenship shaped by universal humanitarian values and ethics The purpose of this book is to promote through education and dialogue global citizenship multi culturalism and mutual understanding and harmony among the people of all races cultures religions and alternative belief systems Global citizenship education including learning about and respecting each other s cultures and faiths leads to harmony cohesion and mutual understanding within often increasingly diverse communities and also to the wider interdependent global community of which we are all members *A Leap of Faith to a Better World* *Cultivating Global Citizenship?* Jeffrey Matthew Palis,2010 Author s abstract This study explores my border crossing experience among and
