Conservation of Architectural and Urban Heritage Tarek Teba, Antonino Di Raimo, 2025-08-05 This book peers into the concept of conservation under the framework of sustainability The world's architectural history is in danger due to a lack of understanding expertise and care Some monuments have already been lost and more are under threat Heritage needs to be well understood interpreted defined and managed for future generations as it provides communities and cultures with retrospection and contributes to recorded history Additionally it discusses the relationship between cultural heritage preservation and sustainable development as well as restoration efforts for tangible and intangible cultural heritage assets The book aims to assist professionals working in the field of heritage conservation whether it is cultural rural architectural tangible or intangible It stands to be a valuable resource for architects and engineers as well as for conservators archaeologists environmentalists and policy makers

Spectrophotometry, 2014-06-28 This volume is an essential handbook for anyone interested in performing the most accurate spectrophotometric or other optical property of materials measurements The chapter authors were chosen from the leading experts in their respective fields and provide their wisdom and experience in measurements of reflectance transmittance absorptance emittance diffuse scattering color and fluorescence The book provides the reader with the theoretical underpinning to the methods the practical issues encountered in real measurements and numerous examples of important applications Written by the leading international experts from industry government and academia Written as a handbook with in depth discussion of the topics Focus on making the most accurate and reproducible measurements Many practical applications and examples

Nielsen's Food Analysis B. Pam Ismail, S. Suzanne Nielsen, 2024-06-24 This sixth edition provides information on techniques needed to analyze foods for chemical and physical properties The book is ideal for undergraduate courses in food analysis and it is also an invaluable reference for professionals in the food industry General information chapters on regulations labeling sampling and data handling provide background information for chapters on specific methods to determine chemical composition and characteristics physical properties and constituents of concern Methods of analysis cover information on the basic principles advantages limitations and applications The information on food analysis applications has been expanded in a number of chapters that cover basic analytical techniques Instructors who adopt the textbook can contact B Ismail for access to a website with related teaching materials

Global Impacts of Micro- and Nano-Plastic Pollution Gaur, Nisha, Sharma, Eti, Nguyen, Tuan Anh, Bilal, Muhammad, Melkania, Niranjan Prakash, 2024-09-25 The presence of micro and nano plastic pollution has emerged as a critical threat to environmental sustainability As plastic materials degrade into smaller particles less than 5 millimeters in size they infiltrate terrestrial ecosystems posing a danger to both the environment and human health Despite the ongoing efforts of scientists worldwide the scientific community still faces significant challenges in fully grasping the complexity and degradation of these microplastics and nanoplastics let alone finding effective solutions to curb

their further spread As the urgency to address this issue grows there is a pressing need for a comprehensive resource that delves into the intricacies of micro and nano plastic pollution and offers actionable insights for mitigation Global Impacts of Micro and Nano Plastic Pollution meticulously tackles the multifaceted challenges posed by plastic pollution in our global ecosystems Authored by esteemed experts in the field this book offers a holistic analysis of micro plastics and nano plastics providing readers with invaluable insights into their characterization sources and fate in the environment Through comprehensive case studies and cutting edge research readers will gain a deeper understanding of the adverse effects of broken down plastics pollution on soil health plant biology and overall ecological balance

High Performance Liquid Chromatography in Pesticide Residue Analysis Tomasz Tuzimski, Joseph Sherma, 2015-05-20 HPLC is the principal separation technique for identification of the pesticides in environmental samples and for quantitative analysis of analytes At each stage of the HPLC procedure the chromatographer should possess both the practical and theoretical skills required to perform HPLC experiments correctly and to obtain reliable repeatable and r

Characterization of Solid Materials and Heterogeneous Catalysts, 2 Volume Set Michel Che, Jacques C. Védrine, 2012-05-14 This two volume book provides an overview of physical techniques used to characterize the structure of solid materials on the one hand and to investigate the reactivity of their surface on the other Therefore this book is a must have for anyone working in fields related to surface reactivity Among the latter and because of its most important industrial impact catalysis has been used as the directing thread of the book After the preface and a general introduction to physical techniques by M Che and J C Védrine two overviews on physical techniques are presented by G Ertl and Sir J M Thomas for investigating model catalysts and porous catalysts respectively The book is organized into four parts Molecular Local Spectroscopies Macroscopic Techniques Characterization of the Fluid Phase Gas and or Liquid and Advanced Characterization Each chapter focuses upon the following important themes overview of the technique most important parameters to interpret the experimental data practical details applications of the technique particularly during chemical processes with its advantages and disadvantages conclusions

Overcoming the Challenges of Herbal Adulteration in a Globalized World Anthony Booker, Aljawharah Alqathama, Stefan Gafner, Sukvinder Kaur Bhamra, 2022-01-12

Analysis of Microplastics and Nanoplastics Huahong Shi, Chengjun Sun, 2024-10-04 Analysis of Microplastics and Nanoplastics comprehensively overviews the common analytical methods for microplastic and nanoplastic analysis With a strong focus on sustainability the book covers the analysis process from sampling separation enrichment observation to identification of polymer composition and a presentation of data This book presents the unique features of microplastics and nanoplastics as particle contaminants their heterogenous distribution in the environments and biota and the complexity and difficulty of their analysis compared with typical solvent contaminants Analysis of Microplastics and Nonoplastics will provide researchers with a solid background to the environmental issues analytical challenges and current state of the different available methods for micro and nanoplastics to start or develop

research Comprehensively discusses the common analytical methods of microplastics and nanoplastics providing basic fundamental knowledge of this hot topic Presents the new advances in this growing field Provides a tool book for readers
