Lind, Erik T. Rankin, 2015-06-19 A collection of expert essays examines the privacy rights that have been lost in the post 9 11 era giving students and others the knowledge they need to take back their constitutional protections This timely two volume collection shares information every citizen should have tackling the erosion of privacy rights engendered by the ability of digital technology to intercept mine and store personal data most often without the knowledge of those being monitored Examining its subject through the lens of Fourth Amendment rights the work focuses on technological advances that now gather personal data on an unprecedented scale whether by monitoring social media tracking cell phones or using

thermal imaging to watch people's movement. It also examines the possible impact of the widespread gathering of such data by law enforcement and security agencies and by private corporations such as Google. Organized by hot button topics confronting U.S. citizens in the post 9/11 era, the work reviews the original intent of the Fourth Amendment and then traces the development and erosion of interpretations of that amendment in the 21st century. Topical essays offer a comprehensive treatment and understanding of current Fourth Amendment issues including those that have been brought before the courts and those relative to the continuing governmental and societal emphasis on security and public safety since the Columbine shootings in 1999 and the events of September 11, 2001.

Your Data, Their Billions Jane S. Hoffman, 2022-04-19. THE GUIDE TO USING EVERYDAY TECH FROM GOOGLE SEARCHES AND AMAZON TO GPS AND FACEBOOK WITH EYES WIDE OPEN. What if somebody knew everything about you? Your relationships, work, social, and private family history, finances, and medical records, even your exact location at any time of the day, personal preferences, and purchases. Somebody does. That somebody is Big Tech: Facebook, Google, Amazon, Apple, and Microsoft. They know more about you than you do. And they make billions of dollars by cashing in on your private data. Our personal data, which Big Tech companies get for free, is the engine that drives the unregulated free-for-all Wild West world called the digital marketplace. These corporate giants may bring us information and entertainment convenience and connection, but they also do a lot of harm by threatening our privacy, discovering and disseminating our personal information, spreading dangerous misinformation from foreign governments, and bad actors manipulating our behavior, affecting what we see, buy, even who we vote for. So what can we do about it? This eye-opening book provides vital information that has been out of reach to those who need it most: the millions of Facebook, Google, Amazon, Apple, and Microsoft users who have come to love and depend upon these digital products. Veteran consumer advocate Jane Hoffman makes the complex world of Big Tech simple to grasp as she reveals exactly how Big Tech uses and abuses your personal information. And she proposes a bold blueprint for reforming these corporate behemoths, including a data dividend. *Your Data, Their Billions* is a guidebook to everything at stake in our digital society, from Big Tech's overreach into our daily lives to its practices that threaten our democracy. Knowledge is power, and it starts here.
