system and proved that ideas are independent of political walls A few years later the Berlin Wall collapsed and Professors Sommer and Klette proposed a new formula for the CAIP let it be held in Central and Eastern Europe every second year There was a sense of solidarity with scientic communities in those countries that found themselves in a state of transition to a new economy A well implemented idea resulted in a chain of successful events in Dresden 1991 Budapest 1993 Prague 1995 Kiel 1997 and Ljubljana 1999 This year the conference was welcomed at Warsaw There are three invited lectures and about 90 contributions written by more than 200 authors from 27 countries Besides Poland 60 authors the largest representation comes from France 23 followed by England 16 Czech Republic 11 Spain 10 G many 9 and Belarus 9 Regrettably in spite of free registration fees and free accommodation for authors from former Soviet Union countries we received only one accepted paper from Russia **Design and Implementation of Portable Impedance Analyzers** Abdulwadood A. Al-Ali, Brent J. Maundy, Ahmed S. Elwakil, 2019-02-23 The increasing interest in the bio impedance analysis in various fields has increased the demand for portable and low cost impedance analyzers that can be used in the field Simplifying the hardware is crucial to maintaining low cost and portability but this is not an easy task due to the need for accurate phase and magnitude measurements This book discusses different portable impedance analyzers design techniques Additionally complete designs using two different approaches are reported.
