Cohesion in English M.A.K. Halliday, Ruqaiya Hasan, 2014-01-14 Cohesion in English is concerned with a relatively neglected part of the linguistic system its resources for text construction the range of meanings that are specifically associated with relating what is being spoken or written to its semantic environment A principal component of these resources is cohesion This book studies the cohesion that arises from semantic relations between sentences Reference from one to the other repetition of word meanings the conjunctive force of but so then and the like are considered Further it describes a method for analysing and coding sentences which is applied to specimen texts **Cohesion in English** Michael Alexander Kirkwood Halliday, 1976 **Syntax-Based Collocation Extraction** Violeta Seretan, 2011-01-04 Syntax Based Collocation Extraction is the first book to offer a comprehensive up to date review of the theoretical and applied work on word collocations Backed by solid theoretical results the computational experiments described based on data in four languages provide support for the book's basic argument for using syntax driven extraction as an alternative to the current cooccurrence based extraction techniques to efficiently extract collocational data The work described in Syntax Based Collocation Extraction focuses on using linguistic tools for corpus based identification of collocations It takes advantage of recent advances in parsing to propose a novel deep syntactic analytic collocation extraction that has applicability to a range of important core tasks in Computational Linguistics The book is useful for anyone interested in computational analysis of texts collocation phenomena and multi word expressions in general **Discourse Patterns in Spoken and Written Corpora** Karin Aijmer, Anna-Brita Stenström, 2004-01-01 This book brings together a number of empirical studies that use corpora to study discourse patterns in speech and writing It explores new trends in the area of text and discourse characterized by the alliance between text linguistics and areas such as corpus linguistics genre analysis literary stylistics and cross linguistic studies The contributions to the volume show how established corpora can be used to ask a number of new questions about the interface between speech and writing the relation between grammar and discourse academic discourse cohesive markers stylistic devices such as metaphor deixis and non verbal communication The corpora used for text analysis can also be tailor made for the study of particular genres such as journal article abstracts lectures e mailing list messages headlines and titles A recent development is to bring in contrastive data from bilingual corpora to show what is language specific in the organization of the text *What is the Matter with Communicative Competence?* Reinhold Peterwagner, 2005 This book integrates recent findings of linguistic research into ELT Its aim is to introduce future teachers to the complex concept of communicative competence to critically analyse learners teaching learning deficiencies in the light of the requirements they are expected to meet at the school leaving exams or at university entry to offer suggestions about how to remedy these shortcomings and also to provide teaching and testing materials *A Theory of Conventional Implicature and Pragmatic Markers in Chinese* Guangwu Feng, 2010 Conventional implicature is itself a highly controversial

English Discourse Markers of Reformulation M. Milagros del Saz Rubio,2007 This book deals with the notion of reformulation and more specifically with a group of lexico grammatical units which help codify and signal the activity of reformulation in English While discourse markers in English have been described in detail the area of reformulation is a relatively unexplored area in comparison with languages such as French or Spanish In this respect this book has been conceived as a contribution to the field of Discourse Markers and in particular to the markers that help display the function of reformulation in English First of all a definition of the notion of reformulation is provided as a necessary precondition for the elaboration of a taxonomy of English reformulators These are grouped into different classes and sub classes on the basis of the type of reformulation effected Thus four main types are identified Expansion Modification Reassessment and Compression After an inductive and interpretive analysis of examples taken from the British National Corpus BNC the syntactic and distributional properties of these units as well as their environments of use are described and discussed
