 The Handbook serves a spectrum of individuals from those who are directly involved in the chemical industry to others in
 related industries and activities It provides not only the underlying science and technology for important industry sectors but
 also broad coverage of critical supporting topics Industrial processes and products can be much enhanced through observing
 the tenets and applying the methodologies found in chapters on Green Engineering and Chemistry specifically biomass
 conversion Practical Catalysis and Environmental Measurements as well as expanded treatment of Safety chemistry plant
 security and Emergency Preparedness Understanding these factors allows them to be part of the total process and helps
 achieve optimum results in for example process development review and modification Important topics in the energy field
 namely nuclear coal natural gas and petroleum are covered in individual chapters Other new chapters include energy
 conversion energy storage emerging nanoscience and technology Updated sections include more material on biomass
 conversion as well as three chapters covering biotechnology topics namely Industrial Biotechnology Industrial Enzymes and
