Crawford, Denis M. Parker, William W. McKinlay, 1992

This is a wide ranging text concerned with the principles and practice of neuropsychological assessment in the adult. It combines a flexible hypothesis testing approach to assessment with information on specialized test batteries. The book covers the major areas of memory, language, perception, attention, and executive dysfunctions and includes chapters on dementia, alcohol, drug, and toxic conditions, stroke, and closed head injury. Assessment of dysfunction in cases involving claims for compensation and chapters on specialized assessment techniques including automated test procedures are provided. The book presents a sound introduction to this complex area and gives guidelines for the clinician who may need concise information on a specialized topic.

Handbook of Pediatric Neuropsychology Andrew S. Davis, 2010-10-25 By far the most comprehensive and detailed coverage of pediatric neuropsychology available in a single book today. Davis provides coverage of basic principles of pediatric neuropsychology but overall the work highlights applications to daily practice and special problems encountered by the pediatric neuropsychologist. Cecil R. Reynolds, PhD, Texas A M University. The breadth and depth of this body of work is impressive. Chapters written by some of the best researchers and authors in the field of pediatric neuropsychology address every possible perspective on brain-behavior relationships culminating in an encyclopedic text. This book reflects how far and wide pediatric neuropsychology has come in the past 20 years and the promise of how far it will go in the next. Elaine Fletcher-Janzen, EdD, NCSP, ABPdN, The Chicago School of Professional Psychology. It would be hard to imagine a clinical situation in pediatric neuropsychology in which this book would fail as a valuable resource. Archives of Clinical Neuropsychology. I believe there is much to recommend this hefty volume. It is a solid reference that I can see appreciating as a resource as I update my training bibliography. Journal of the International Neuropsychological Society. This landmark reference covers all aspects of pediatric neuropsychology from a research-based perspective while presenting an applied focus with practical suggestions and guidelines for clinical practice. Useful both as a training manual for graduate students and as a comprehensive reference for experienced practitioners, it is an essential resource for those dealing with a pediatric population. This handbook provides an extensive overview of the most common medical conditions that neuropsychologists encounter while dealing with pediatric populations. It also discusses school-based issues such as special education, law, consulting with school staff, and reintegrating children back into mainstream schools. It contains over 100 well-respected authors who are leading researchers in their respective fields. Additionally, each of the 95 chapters includes an up-to-date review of available research, resulting in the most comprehensive text on pediatric neuropsychology available in a single volume. Key Features: Provides thorough information on understanding functional neuroanatomy and development and

on using functional neuroimaging Highlights clinical practice issues such as legal and ethical decision making dealing with child abuse and neglect and working with school staff Describes a variety of professional issues that neuropsychologists must confront during their daily practice such as ethics multiculturalism child abuse forensics and psychopharmacology

Handbook of Clinical Neuropsychology Susan B. Filskov, Thomas J. Boll, Handbook of Cross-Cultural Neuropsychology Elaine Fletcher-Janzen, Tony L. Strickland, Cecil R. Reynolds, 2000-08-31 Historically relatively few investigations in neuropsychology have been sensitive to the analysis of cultural variables This handbook will assist the neuropsychologist interested in cultural competence and help increase understanding of the link between cultural competence in assessment and intervention and good treatment outcomes The handbook authors provide an in depth discussion of the current status of multicultural training in neuropsychology specific information on diverse groups age gender ethnicity etc assessment instruments and clinical populations HIV infected seizure disorders brain injuries and unique analysis of immigration patterns forensics and psychopharmacology This volume is the first to summarize the cultural data available in neuropsychology A valuable resource for clinical neuropsychologists school psychologists and rehabilitation professionals
