

4. Three forces of 12 N, 16 N and 20 N act on an object which is in equilibrium. The angle between the 16 N and the 20 N force is

(A)  $37^\circ$ , (B)  $53^\circ$ ,  
(C)  $127^\circ$ , (D)  $143^\circ$ .

( )

Hint: Draw out the forces acting on the object.

5. A uniform sphere of mass 3.0 kg rests between two smooth planes as shown.

Determine the force exerted by the vertical plane on the sphere.

(A) 0 N (B) 17 N  
(C) 30 N (D) 34 N

( )

Hint: Consider free-body diagram and conditions for equilibrium, e.g.  $\Sigma F = 0$ .

6. A rod of length 1 metre has non-uniform composition, so that its centre of mass is not at its geometrical centre.

The rod is then supported horizontally across two top-pan balances as shown in the diagram. The balances (previously set at zero) give readings of 240 grams and 360 grams as shown.

Where is the centre of gravity of the rod relative to its geometrical centre?

**Neo-Aristotelian Perspectives in Metaphysics** Daniel D. Novotný, Lukáš Novák, 2014-04-16 This volume re examines some of the major themes at the intersection of traditional and contemporary metaphysics The book uses as a point of departure Francisco Suarez's Metaphysical Disputations published in 1597 Minimalist metaphysics in empiricist pragmatist clothing have today become mainstream in analytic philosophy Independently of this development the progress of scholarship in ancient and medieval philosophy makes clear that traditional forms of metaphysics have affinities with some of the streams in contemporary analytic metaphysics The book brings together leading contemporary metaphysicians to investigate the viability of a neo Aristotelian metaphysics **Conversations on Quantum Gravity** Jácome (Jay) Armas, 2021-08-26 The holy grail of theoretical physics is to find the theory of everything that combines all the forces of nature including gravity This book addresses the question how far are we from such discovery Over the last few decades multiple roads to finding a quantum theory of gravity have been proposed but no obvious description of nature has emerged in this domain What is to be made of this situation This volume probes the state of the art in this daunting quest of theoretical physics by collecting critical interviews with nearly forty leading theorists in this field These broad ranging conversations give important insights

and candid opinions on the various approaches to quantum gravity including string theory loop quantum gravity causal set theory and asymptotic safety This unique readable overview provides a gateway into cutting edge research for students and others who wish to engage with the open problem of quantum gravity      **Corpsman** ,1973-03      **Lepton and Photon Interactions at High Energies** Harry W. **Doing the Hard Work** Joan Wills, Karen Ramsey-Idem, 2022-05-18 One of the best ways to encourage women to enter or continue in engineering is to hear about and see examples of other women in the field to whom they can relate Joan Wills and Karen Ramsey Idem bring together diverse talented women across the commercial vehicle industry to share her unique experiences including the habits motivations triumphs defeats and lessons learned that helped each thrive in her leadership roles These leaders represent three different generations across U S Europe Africa and Asia Doing the Hard Work provides insights that have relevance for women at all stages in their careers whether its young women interested in pursuing a career in the auto industry those looking for their next strategic move or those seeking insight and inspiration An important contribution to the literature to encourage women to become engineers and continue careers in STEM Maxine L Savitz Vice President National Academy of Engineering ISBN 9781468604030 ISBN 9781468604054 ISBN 9781468604047 DOI 10 4271 9781468604047      *Ontology and the Ambitions of Metaphysics* Thomas Hofweber, 2016-08-11 Many significant problems in metaphysics are tied to ontological questions but ontology and its relation to larger questions in metaphysics give rise to a series of puzzles that suggest that we don't fully understand what ontology is supposed to do nor what ambitions metaphysics can have for finding out about what reality is like Thomas Hofweber aims to solve these puzzles about ontology and consequently to make progress on four central metaphysical problems the philosophy of arithmetic the metaphysics of ordinary objects the problem of universals and the question of whether the reality is independent of us Crucial parts of the proposed solution involve considerations about quantification and its relationship to ontology the place of reference in natural languages the possibility of ineffable facts the extent of empirical evidence in metaphysics and whether metaphysics can be properly esoteric Overall Hofweber defends a rationalist account of arithmetic an empiricist picture in the philosophy of ordinary objects a restricted form of nominalism and realism about reality understood as all there is but idealism about reality understood as all that is the case He defends metaphysics as having some questions of fact that are distinctly its own

with a limited form of autonomy from other parts of inquiry but rejects several metaphysical projects and approaches as being based on a mistake      *Lepton And Photon Interactions At High Energies: Lepton-photon 2003 - Proceedings Of The Xxi International Symposium* Harry W K Cheung, Tracey S Pratt, 2004-02-20 This volume contains contributions to the XXI International Symposium on Lepton and Photon Interactions at High Energies held at the Fermi National Accelerator Laboratory It gives up to date reviews of all aspects of particle physics written by leading practitioners in the field The review nature of all the articles makes this volume more accessible to students and researchers in other fields of physics In addition to new experimental data and advances in theory the future directions and prospects for the field are covered The proceedings have been selected for coverage in Index to Scientific Technical Proceedings ISTP ISI Proceedings Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings CC Proceedings Engineering Physical Sciences
