Copycats & Contrarians Michelle Baddeley, 2018-07-10 Why we run with or avoid the crowd and why it matters from choosing a restaurant in a tourist trap to believing fake news I learned a lot Tim Harford author of The Undercover Economist Rioting teenagers tumbling stock markets and the spread of religious terrorism appear to have little in common but all are driven by the same basic instincts the tendency to herd follow and imitate others In today's interconnected world group choices all too often seem maladaptive With unprecedented speed information or misinformation flashes across the globe and drives rapid shifts in group opinion Adverse results can include speculative economic bubbles irrational denigration of scientists and other experts seismic political reversals and more Drawing on insights from across the social behavioral and natural sciences Michelle Baddeley explores contexts in which behavior is driven by the herd She analyzes the rational vs nonrational and cognitive vs emotional forces involved and she investigates why herding only sometimes works out well With new perspectives on followers leaders and the pros and cons of herd behavior Baddeley shines vivid light on human behavior in the context of our ever more connected world Her observations on how both risk taking and conformism contributed to Donald Trump's election and on how social media affects copycats make for a well timed and valuable study Publishers Weekly This might well become the defining book for this decade and more on the topic of herding and social influence

I'll Have What She's Having R. Alexander Bentley, Mark Earls, Michael J. O'Brien, 2025-02-04 How we learn from those around us an essential guide to understanding how people behave Humans are first and foremost social creatures And this according to the authors of I'll Have What She's Having shapes and explains most of our choices We're not just blindly driven by hard wired instincts to hunt or gather or reproduce our decisions are based on more than nudges exploiting individual cognitive quirks I'll Have What She's Having shows us how we use the brains of others to think for us and as storage space for knowledge about the world The story zooms out from the individual to small groups to the complexities of populations It describes among other things how buzzwords propagate and how ideas spread how the swine flu scare became an epidemic and how focused social learning by a few gets amplified as copying by the masses It describes how ideas behavior and culture spread through the simple means of doing what others do It is notoriously difficult to change behavior For every Yes We Can political slogan there are thousands of Just Say No buttons I'll Have What She's Having offers a practical map to help us navigate the complex world of social behavior an essential guide for anyone who wants to understand how people behave and how to begin to change things

So What? Kevin Duncan,2008-02-28 So What gets straight to the point so you can cut through the noise and nonsense of work Much of what we learn in our formative years is unlearned in later life As grown ups we are often unable to answer the simplest of questions in a clear direct way and frequently have no idea why we are doing something This can lead to crippling inefficiency in business and goes some way to explaining why so many people spend so much time doing things that have no bearing on the true purpose by behaving in a genuinely inquisitive way you can get right to the heart of the matter and save yourself hours days and even months of anguish The questions So what Why How and When can be hugely effective when applied in the right context and this book shows you how to use them Once all the right questions have been posed there is a final sure fire method for testing whether something is relevant and helpful By completing the sentence Something must be wrong if it is simple to work out if you are wasting your time For example Something must be wrong if I don t want to go to work in the morning So What shows you how to become truly inquisitive again So let the questions roll Pay attention to what the answers are Learn from them and you will immediately improve your prospects of finally getting somewhere in life
