Herzog & de Meuron, 1997 **Herzog & de Meuron 1978-1988** Gerhard Mack, 1997 **Herzog & de Meuron** Herzog & de Meuron, 2005 More than any of their contemporaries Swiss architects Jacques Herzog and Pierre de Meuron are challenging the boundaries between architecture and art Natural History explores that challenge examining how the work of this formidable pair has drawn upon the art of both past and present and brought architecture into dialogue with the art of our time Echoing an encyclopedia this publication reflects the natural history museum structure of the exhibition which it accompanies organized by the Canadian Centre for Architecture Models and projects by Herzog de Meuron as well as by other artists are structured around six thematic portfolios that suggest an evolutionary history of the architects work Appropriation Reconstruction Transformation Alienation Stacking Compression Imprints Moulds Interlocking Spaces and Beauty Atmosphere Each section is introduced with a statement from Herzog and more than 20 artists scholars and architects have contributed essays including Carrie Asman Georges Didi Huberman Kurt W Forster Boris Groys Ulrike Meyer Stump Peggy Phelan Thomas Ruff Rebecca Schneider Adolf Max Vogt and Jeff Wall *Herzog and de Meuron 1978-1988* Gerhard Mack, 1997 *The Architecture of Light* Mary Ann Steane, 2012-11-12 Reviewing the use of natural light by architects in the era of electricity this book aims to show that natural light not only remains a potential source of order in architecture but that natural lighting strategies impose a usefully creative discipline on design Considering an approach to environmental context that sees light as a critical aspect of place this book explores current attitudes to natural light by offering a series of in depth studies of recent projects and the particular lighting issues they have addressed It gives a more nuanced appraisal of these lighting strategies by setting them within their broader topographic climatic and cultural contexts

Herzog & de Meuron: 1978-1988 Gerhard Mack, 1997 **Architecture by Herzog & de Meuron, Wall Painting by Rémy Zaugg, a Work for Roche Basel** Rémy Zaugg, 2001-11-01 Between 1996 and 2000 the renowned architects Herzog de Meuron built a new research centre together with a library auditorium and cafeteria for the pharmaceutical company Roche in Basle Situated on the outskirts of the town on the edge of the industrial area the building was to include a closed section for laboratories yet should also be publicly accessible the ideal starting point for an interdisciplinary solution Artist R my Zaugg worked together with the architects developing the colours used In particular he created a dramatic blue wall which separates public and restricted areas This publication documents the entire project from its genesis to the completed construction using texts sketches plans and photographs More than a mere monograph this book provides a fascinating glimpse into the creative collaboration occurring between architects and artists **Herzog and de Meuron 1978-88** Gerhard Mack, 1997 **Touching Architecture** Anthony Brand, 2022-12-30 This book is about perception emotion and affect in architecture how and why we feel the way that we do and the ways in which our surroundings and bodies contribute to this Our experience of architecture is an embodied one with all our senses acting in concert as we move through time and

space The book picks up where much of the critique of architectural aestheticism at the end of the twentieth century left off illustrating the limitations and potential consequences of attending to architecture as the visually biased practice which has steadily become the status quo within both industry and education It draws upon interdisciplinary research to elucidate the reasons why this is counter productive to the creation of meaningful places and to articulate the embodied richness of our touching encounters A felt phenomenology is introduced as a more than visual alternative capable of sustaining our physical emotional and psychological well being By recognising the reciprocal and participatory relationship that exists between atmospheric affect and our phenomenological bodies we begin to appreciate the manifold ways in which we touch and are touched by our built environment As such *Touching Architecture* will appeal to those with an interest in architectural history and theory as well as those interested in the topic of atmospheres affect and embodied perception

Ornament and European Modernism Loretta Vandl, 2017-09-22 These in depth historical and critical essays study the meaning of ornament the role it played in the formation of modernism and its theoretical importance between the mid nineteenth century and the late twentieth century in England and Germany Ranging from Owen Jones to Ernst Gombrich through Gottfried Semper Alois Riegl August Schmarsow Wilhelm Worringer Adolf Loos Henry van de Velde and Hermann Muthesius the contributors show how artistic theories are deeply related to the art practice of their own times and how ornament is imbued with historical and social meaning

On-site Terence Riley, 2005 On Site ISBN 0 87070 499 0 U S 45 00 Paperback 9 x 10 5 in 280 pgs 295 color and 165 b w Item February Architecture Featuring 36 buildings that have made Spain a center for architectural innovation and excellence

Metamorphism Ákos Moravánszky, 2017-11-20 Materiality is a recurring and central issue in architecture This book explains how materials are constructed how they become cultural substances Metamorphism investigates the complex relationship between natural materials and technology science and sensuality Gottfried Semper 1803 1879 made the notion of Stoffwechsel the key element of his theory With this concept he intended to explain how a structural form originally bound to a method of processing is transferred from one material to another liberated from its original function For the first time the book investigates the subject from a historic point of view whilst reflecting on current interdisciplinary research Examples from Aalto to Zumthor illustrate the specific aspects of historic and contemporary material concepts

The Hybrid Practitioner Caroline Voet, Eireen Schreurs, Helen Thomas, 2022-09-01 Exploring different interrelated roles for the architect and researcher The practice of architecture manifests in myriad forms and engagements Overcoming false divides this volume frames the fertile relationship between the cultural and scholarly production of academia and the process of designing and building in the material world It proposes the concept of the hybrid practitioner who bridges the gap between academia and practice by considering how different aspects of architectural practice theory and history intersect opening up a fascinating array of possibilities for an active engagement with the present The book explores different interrelated roles for practicing architects and researchers from the reproductive activities of

teaching consulting and publishing through the reflective activities of drawing and writing to the practice of building The notion of the hybrid practitioner will appeal strongly to students teachers and architectural practitioners as part of a multifaceted professional environment By connecting academic interests with those of the professional realm The Hybrid Practitioner addresses a wider readership embracing landscape design art theory and aesthetics European history and the history and sociology of professions **The Pritzker Architecture Prize, 2001** ,2001 *Architecture Oriented Otherwise* David Leatherbarrow,2012-04-17 So much writing about architecture tends to evaluate it on the basis of its intentions how closely it corresponds to the artistic will of the designer the technical skills of the builder or whether it reflects the spirit of the place and time in which it was built making it not much more than the willful or even subconscious assemblage of objects that result from design and construction techniques Renowned writer and thinker David Leatherbarrow in this groundbreaking new book argues for a richer and more profound but also simpler way of thinking about architecture namely on the basis of how it performs Not simply how it functions but how it acts its manner of existing in the world including its effects on the observers and inhabitants of a building as well as on the landscape that situates it In the process Leatherbarrow transforms our way of discussing buildings from a passive technical or programmatic assessment to a highly active and engaged examination of the lives and performances intended and otherwise of buildings Constructing Architecture Andrea Deplazes,2005-07-25 Now in its second edition the trailblazing introduction and textbook on construction includes a new section on translucent materials and an article on the use of glass □□□□-□□□□□□□□□□, 1978-2002 Herzog & de Meuron,2002 Betr u a das Studio R my Zaugg in Mulhouse S 262 267 **The Pritzker Architecture Prize** ,2001 □□□□ ,2002 **The New Spanish Architecture** Anatxu Zabalbeascoa,1992 Traces the history of architecture in Spain since World War II and examines the work of thirteen architects and firms
