Structures P. Mäkeläinen, P. Hassinen, 1999-06-02 ICSAS 99 The Fourth International Conference on Steel and Aluminium Structures was a sequel to ICSAS 87 held in Cardiff UK to ICSAS 91 held in Singapore and to ICSAS 95 held in Istanbul Turkey The objective of the conference was to provide a forum for the discussion of recent findings and developments in the design and construction of various types of steel and aluminium structures The conference was concerned with the analysis modelling and design of light weight or slender structures in which the primary material is structural steel stainless or aluminium The structural analysis papers presented at the conference cover both static and dynamic behaviour instability behaviour and long term behaviour under hygrothermal effects The results of the latest research and development of some new structural products were also presented at the conference A total of 76 papers and 30 posters were presented at the conference by participants from 36 countries in all 6 continents Proceedings, 1997

Data Analysis in Pavement Engineering Qiao Dong, Xueqin Chen, Baoshan Huang, 2023-11-06 Data Analysis in Pavement Engineering Theory and Methodology offers a complete introduction to the basis of the finite element method covering fundamental theory and worked examples in the detail required for readers to apply the knowledge to their own engineering problems and understand more advanced applications This edition sees the significant addition of content addressing coupling problems including Finite element analysis formulations for coupled problems Details of algorithms for solving coupled problems and Examples showing how algorithms can be used to solve for piezoelectricity and poroelasticity problems Focusing on the core knowledge mathematical and analytical tools needed for successful application this book represents the authoritative resource of choice for graduate level students researchers and professional engineers involved in finite element based engineering analysis This book is the first comprehensive resource to cover all potential scenarios of data analysis in pavement and transportation infrastructure research including areas such as materials testing performance modeling distress detection and pavement evaluation It provides coverage of significance tests design of experiments data mining data modeling and supervised and unsupervised machine learning techniques It summarizes the latest research in data analysis within pavement engineering encompassing over 300 research papers It delves into the fundamental concepts elements and parameters of data analysis empowering pavement engineers to undertake tasks typically reserved for statisticians and data scientists The book presents 21 step by step case studies showcasing the application of the data analysis method to address various problems in pavement engineering and draw meaningful conclusions *The Application of Stress-wave Theory to Piles* Jaime Alberto dos Santos, 2008 This volume contains 101 papers presented at the 8th International Conference on the Application of Stress Wave Theory to Piles held in Lisbon Portugal in 2008 It is divided in 14 chapters according to the conference themes Wave mechanics applied to pile engineering Relationship between static resistance to driving and long term static soil resistance Case histories involving measurement and analysis of stress waves Dynamic monitoring of driven piles Dynamic soil pile interaction models numerical and physical modeling High strain dynamic test Low strain dynamic test

Rapid load test Monitoring and analysis of vibratory driven piles Correlation of dynamic and static load tests Quality assurance of deep foundations using dynamic methods Incorporation of dynamic testing into design codes and testing standards Ground vibrations induced by pile motions Dynamic measurements in ground field testing This conference aims to contribute to a better and more efficient professional interaction between specialized contractors designers and academicians By joining the contribution of all of them it was possible to elucidate the today s state of the art in science technology and practice in the application of stress wave theory to piles

BOOK JACKET *Engineering Hydrology of Arid and Semi-Arid Regions* Mostafa M. Soliman, 2010-06-23 The natural scarcity of water in arid and semiarid regions aggravated by man made factors makes it difficult to achieve a reliable water resources supply Communities in these areas pay the price for thousands of years of water manipulation Presenting important insight into the complexities of arid region hydrology

Engineering Hydrology of Arid *Bearing Capacity of Roads, Railways and Airfields* Andreas Loizos, Imad Al-Qadi, Tom Scarpas, 2017-07-20 Bearing Capacity of Roads Railways and Airfields includes the contributions to the 10th International Conference on the Bearing Capacity of Roads Railways and Airfields BCRRA 2017 28 30 June 2017 Athens Greece The papers cover aspects related to materials laboratory testing design construction maintenance and management systems of transport infrastructure and focus on roads railways and airfields Additional aspects that concern new materials and characterization alternative rehabilitation techniques technological advances as well as pavement and railway track substructure sustainability are included The contributions discuss new concepts and innovative solutions and are concentrated but not limited on the following topics Unbound aggregate materials and soil properties Bound materials characteristics mechanical properties and testing Effect of traffic loading In situ measurements techniques and monitoring Structural evaluation Pavement serviceability condition Rehabilitation and maintenance issues Geophysical assessment Stabilization and reinforcement Performance modeling Environmental challenges Life cycle assessment and sustainability Bearing Capacity of Roads Railways and Airfields is essential reading for academics and professionals involved or interested in transport infrastructure systems in particular roads railways and airfields
