Iggers, 1997 A broad perspective on historical thought writing by one of the world's foremost historiographers **The Postmodern Challenge** Bo Stråth, Nina Witoszek, 1999 This volume is designed to bridge a gap in the current theoretical debate about the nature scope and relevance of postmodern perspectives in the humanist and social sciences in Eastern and Western Europe It comprises some fifteen essays by leading historians literary theorists and social scientists from Western and Eastern Europe and America It has a threefold aim firstly to illuminate the distinctiveness of current Western and Eastern European theorizing about history and society secondly to reveal points of tension and disagreement and finally to open up a space for a meeting of seemingly incompatible worlds **A Global History of History** Daniel Woolf, 2011-02-17 An illustrated survey of global historical scholarship from the ancient world to the present for courses in theory and historiography **The Houses of History** Anna Green, Kathleen Troup, 1999 An introduction to the major theoretical perspectives employed by twentieth century historians Incorporates a range of approaches to the writing of history giving accounts of eleven schools of thought Each chapter begins with a description of the ideas integral to the particular theory which are then explored *The Oxford Handbook of the History of Nationalism* John Breuilly, 2013-03-07 The Oxford Handbook of the History of Nationalism comprises thirty six essays by an international team of leading scholars providing a global coverage of the history of nationalism in its different aspects ideas sentiments and politics Every chapter takes the form of an interpretative essay which by a combination of thematic focus comparison and regional perspective enables the reader to understand nationalism as a distinct and global historical subject The book covers the emergence of nationalist ideas sentiments and cultural movements before the formation of a world of nation states as well as nationalist politics before and after the era of the nation state with chapters covering Europe the Middle East North East Asia South Asia Southeast Asia sub Saharan Africa and the Americas Essays on everyday national sentiment and race ideas in fascism are accompanied by chapters on nationalist movements opposed to existing nation states nationalism and international relations and the role of external intervention into nationalist disputes within states In addition the book looks at the major challenges to nationalism international socialism religion pan nationalism and globalization before a final section considering how historians have approached the subject of nationalism Taken separately the chapters in this Handbook will deepen understanding of nationalism in particular times and places taken together they will enable the reader to see nationalism as a distinct subject in modern world history Nationalism Paul Lawrence, 2016-09-17 Massive changes have taken place in the way nations and nationalism are thought about From being viewed enthusiastically by historians as a force for beneficial change before the First World War today appeals to national sentiment are viewed as far more complex and problematic This book looks at how historians and others such as

sociologists and political theorists have explained the development and enduring importance of national identities from c 1850 to the present day It compares and contrasts a wide range of different theories and will be useful for anyone wanting to equip themselves with a theoretical understanding of why we live in nations and why we invest them with such significance

Historical Theory Mary Fulbrook,2003-10-04 Practising historians claim that their accounts of the past are something other than fiction myth or propaganda Yet there are significant challenges to this view most notably from postmodernism In Historical Theory a prominent historian develops a highly original argument that evaluates the diversity of approaches to history and points to a constructive way forward Mary Fulbrook argues that all historians face key theoretical questions and that an emphasis on the facts alone is not enough Against postmodernism she argues that historical narratives are not simply inventions imposed on the past and that some answers to historical questions are more plausible or adequate than others Illustrated with numerous substantive examples and its focus is always on the most central theoretical issues and on real strategies for bridging the gap between the traces of the past and the interpretations of the present Historical Theory is essential and enlightening reading for all historians and their students

McIntyre, 2023-10-03 The most original historian of his generation That is how the celebrated British academic Noel Annan described Herbert Butterfield 1900 1979 a profound and prolific writer who made important contributions as both a public and academic historian In this authoritative and accessible intellectual biography Kenneth B McIntyre explores the extraordinary range of Butterfield s work He shows why the small book *The Whig Interpretation of History* 1931 achieved such large influence Butterfield he demonstrates has profoundly shaped American and European historiography by

highlighting the distortions that occur when historians interpret the past merely as steps along the way toward the glorious present But McIntyre delves much deeper examining everything from Butterfield s lectures on history historiography and Christianity to his warnings about the dangers of hubris in international affairs to his essays on the origins of modern science which basically created the modern discipline of the history of science This latest volume in the acclaimed Library of Modern Thinkers series helps us understand a prescient and insightful thinker who challenged dominant currents in history

Histories Anne Besnault,2021-11-04 Virginia Woolf s Unwritten Histories explores the interrelatedness of Woolf s modernism feminism and her understanding of history as a site of knowledge and a writing practice that enabled her to negotiate her heritage to find her place among the moderns as a female artist and intellectual and to elaborate her poetics of the new not as radical rupture but as the result of a process of unwriting and rewriting traditional historiographical orthodoxies Its central argument is that unless we comprehend the genealogy of Woolf s historical thought and the complexity of its lineage we cannot fully grasp the innovative thrust of her attempt to think back through our mothers Bringing together canonical texts such as Orlando 1928 A Room of One s Own 1929 Three Guineas 1938 or Between the Acts 1941 and under researched ones among which stand Woolf s essays on historians and reviews of history books and her pieces on literary history and nineteenth century women s literature this book argues that Woolf s textual conversations with nineteenth century writers historians and critics many of which remain unexplored are interwoven with her historiographical poesis and constitute the groundwork for her alternative histories and literary histories unwritten open textured unacademic and polemical counter narratives that keep track of the past and engage politically with the future The Histories of
