legacy as the keeper of strange and dark secrets and the scramble for fame fortune and infamy that her silence spawned But as this novel reminds us some voices simply can't be stilled not by time death or deceit and what we think are lost words sometimes turn out instead to be last words

The Soul of Higher Education Margaret Benefiel, Bo Karen Lee, 2019-05-01 The Soul of Higher Education: Contemplative Pedagogy, Research, and Institutional Life for the Twenty-first Century contributes to an understanding of the importance and implications of a contemplative grounding for higher education It is the sixth in a series entitled Advances in Workplace Spirituality: Theory, Research, and Application which is intended to be an authoritative and comprehensive series in the field This volume consists of chapters written by noted scholars from both Eastern and Western traditions that shed light on the following questions: What is an appropriate epistemological grounding for contemplative higher education? How does the current dominant epistemology in higher education mitigate against contemplative teaching, learning, and research? What alternatives can be offered? How can a contemplative culture be nurtured in the classroom? What difference does that culture make in teaching and learning? What is the role of individual and institutional leadership in creating and sustaining this culture? What is contemplative research? How can the emerging field of contemplative studies fit into the twenty-first century university? What can faculty and students learn from contemplative practices about how to find peace of mind in a world of higher education characterized by increasing complexity, financial pressures, and conflicts? What does a contemplative organizational structure look like in higher education? How can committees, faculty meetings, and administrative teams use contemplative practices to work more effectively together? How can contemplative decision-making processes be used in higher education? Given hierarchies, turf wars, and academics' propensity for using argument as a weapon, is it possible to introduce contemplative practices into decision-making situations in appropriate ways?
