Learning for life Hargreaves, David H.,2004-06-23 Working within the spirit of David Blunkett s visionary foreword to The learning age A new renaissance for Britain David H Hargreaves radical analysis challenges the myth that lifelong learning can or should be separated in any sense from school education It asks the critical question what changes in thinking policy and practice are needed for the culture and process of lifelong learning as visualised by David Blunkett to become a reality Starting with a clear unequivocal statement that whether people are motivated to learn beyond the end of compulsory education and have the capacity to do so depends very much on what happens to them during the school years the author explores ways in which policy and practice at school level will need to change in order to meet the crucial challenge of sparking and sustaining a person s motivation and capacity to learn throughout life Catalog of Copyright Entries. Existential Psychotherapy Irvin D. Yalom, 2020-03-17 The definitive account of existential psychotherapy First published in 1980 Existential Psychotherapy is widely considered to be the foundational text in its field the first to offer a methodology for helping patients to develop more adaptive responses to life's core existential dilemmas In this seminal work American psychiatrist Irvin Yalom finds the essence of existential psychotherapy and gives it a coherent structure synthesizing its historical background core tenets and usefulness to the practice Organized around what Yalom identifies as the four ultimate concerns of life death freedom isolation and meaninglessness the book takes up the meaning of each existential concern and the type of conflict that springs from our confrontation with each He shows how these concerns are manifest in personality and psychopathology and how treatment can be helped by our knowledge of them Drawing from clinical experience empirical research philosophy and great literature Yalom provides an intellectual home base for those psychotherapists who have sensed the incompatibility of orthodox theories with their own clinical experience and opens new doors for empirical research The fundamental concerns of therapy and the central issues of human existence are woven together here as never before with intellectual and clinical results that have surprised and enlightened generations of readers
