

Holt Physics Chapter 6 Momentum Activity Sheet

The graphing calculator can be programmed with the equation

$$Y_1 = M(F-I)/X$$

to produce a graph of force (Y_1) vs. time interval (X). Note that in the equation for Y_1 that F is the final velocity (not force) and I is the initial velocity. In this graphing calculator activity, you will determine the force that must be exerted to change the momentum of an object in different time intervals. You will learn the relationship between time and force, and the importance of the sign of the force and the velocity.

Download the MOM program to your TI-83/84 calculator. Press **PRGM**, then scroll down to MOM by pressing **▢**. Press **ENTER** twice to start the program. Enter the values for mass, initial velocity, and final velocity (see below). The calculator will produce a graph of force vs. time interval. Use **TRACE** to determine the required forces at particular time intervals. Press **2nd****QUIT** to stop viewing the graph. Press **ENTER** to restart the program.

- a. The equation used by the calculator can also be derived from another equation that relates force and mass. What is this equation?

Determine the force that must be exerted on a 0.43 kg soccer ball in a given time interval to cause the changes in momentum in the following situations. Note that when entering negative values on the calculator use the **⊖** key, instead of the **▢** key.

- b. the ball slows from 15 m/s to 0 m/s in 0.025 s
- c. the ball slows from 15 m/s to 0 m/s in 0.25 s
- d. the ball speeds up from 0 m/s to 15 m/s in 0.25 s
- e. the ball speeds up from 5.0 m/s in the $+x$ direction to 22 m/s in the opposite direction in 0.55 s
- f. the ball speeds up from 5.0 m/s in the $-x$ direction to 22 m/s in the opposite direction in 0.55 s
- g. Increasing the time interval _____ (increases or decreases) the magnitude of the force necessary to bring about a specific change in the momentum.
- h. The sign of the force depends on the _____ and _____ of the initial and final velocities.

1950 President Harry Truman gave authorization for the Atomic Energy Commission to conduct weapons tests and
experiments on a section of a Nevada gunnery range Over the next eleven years more than a hundred detonations were
conducted at the Nevada Test Site and radioactive debris dispersed across the communities just downwind and through
much of the country In this important work James C Rice tells the hidden story of nuclear weapons testing and the negligence
of the US government in protecting public health Downwind of the Atomic State focuses on the key decisions and events
shaping the Commission's mismanagement of radiological contamination in the region specifically on how the risks of fallout
were defined and redefined or importantly not defined at all owing to organizational mistakes and the impetus to keep atomic
testing going at all costs Rice shows that although Atomic Energy Commission officials understood open air detonations
injected radioactive debris into the atmosphere they did not understand or seem to care that the radioactivity would
irrevocably contaminate these communities The history of the atomic Southwest should be a wake up call to everyone living
