It comprises of 33 chapters divided into five sections. The initial chapters present the anatomy and physiology of swallowing and the pathophysiology of the dysphagia related structures. It discusses assessment of dysphagia in detail, highlighting clinical and instrumental evaluations. Swallowing dysfunction related to common sub site cancers and chemo radiotherapy related dysphagia are explored individually. The book addresses direct and indirect swallowing therapy methods involving postures and exercises in a detailed yet simple manner to enable them to be incorporated in routine practice. It also covers topics like nutritional management, alternative feeding methods and unique problems associated with tracheostomy that have a great bearing on the day to day management of patients with dysphagia. The current status of the research and evidence based management updates are also included. Additionally, where appropriate, videos are included for a better understanding of the subject. Written and edited by experts in the field, the book is intended for clinicians treating head and neck cancer, head and neck surgeons, radiation oncologists, speech and swallowing therapy specialists and trainees in these fields. **Paramedic Principles and Practice eBook**

Brett Williams, Linda Ross, 2020-10-01 Edited by expert academics and educators Brett Williams and Linda Ross and written by content specialists and experienced clinicians, this essential resource encourages readers to see the links between the pathophysiology of a disease, how this creates the signs and symptoms, and how these should be managed in the out of hospital environment. Additionally, Paramedic Principles and Practice 2e will arm readers with not only technical knowledge and expertise but also the non technical components of providing emergency care including professional attitudes and behaviours, decision making, teamwork and communication skills. Case studies are strategically used to contextualise the principles, step readers through possible scenarios that may be encountered and importantly reveal the process of reaching a safe and effective management plan. The case studies initially describe the pathology and typical presentation of a particular condition and progress to more complex and less typical scenarios where the practitioner faces increasing uncertainty. The only paramedic specific text designed for Australian and New Zealand students and paramedics. Progressive case studies that bridge the gap from principles to practice. More than 40 essential pathologies covering common paramedic call outs. Covers both technical and non technical skills to develop the graduate into expert clinician.
