Microbial Inoculants Parul Chaudhary, Anuj Chaudhary, 2024-04-13 This book discusses the role of microbes in agriculture for plant attributes soil fertility and bio remediation which aid in sustainable agriculture Nowadays due to increase in human population it is essential to increase food productivity in the near future but exhaustive non sustainable agricultural practices such as the usage of agrochemicals threaten food security the economy and the environment globally Soil deterioration is the most serious environmental threat to food production resulting in poverty and hunger in developing countries As a result the global community has faced challenges regarding the development of ecologically sound efficient and long term alternative options to meet rising food requirements Therefore to contribute to food security the advancement of sustainable and innovative modern agriculture aimed at addressing environmental economic and social challenges connected with present intense non sustainable agriculture practices is required As a result beneficial microbial inoculants will be widely used in the development of new strategies to increase sustainable food production Bioinoculant application helps to provide nutrients that directly support soil health and sustainable food production Hence this book offers the role of microbial inoculants for better agronomical performance for sustainable advancement in agriculture and also pays attention to soil health improvement for extensive period benefits The book will be highly recommended for agriculture microbiologists agronomists plant pathologists and related areas

AI for Product Development Kanchan Naithani, Shrikant Tiwari, Shabnam Kumari, 2025-06-25 AI for Product Development explores the transformative role of artificial intelligence in reshaping modern industries This book offers a comprehensive guide spanning the evolution of AI in product innovation to practical applications such as clustering techniques human autonomous vehicle interactions and personalized healthcare solutions With contributions from leading researchers it covers explainable AI real world case studies and ethical considerations in intelligent systems The chapters delve into cutting edge topics such as YOLO model variants AI driven emotion detection and strategies for overcoming AI implementation challenges Designed for researchers professionals and students it bridges theory and practice emphasizing AI's profound impact on product development and beyond

Encyclopedia of Green Materials Chinnappan Baskar, Seeram Ramakrishna, Angela Daniela La Rosa, 2024-12-26 Encyclopedia of Green Materials covers comprehensive overview recent research and development of

Green Materials and Green Nanomaterials and their applications in all areas including electronics sensors textiles biomedical energy and energy storage building constructions and interiors design automotive green plastic manufacturing food packing membrane technology wastewater treatment rubber technology and tire manufacturing The contents focus on sustainable development renewable circular economy Chemistry 4 0 Chemistry through innovation in transforming the world green chemistry and green engineering upcycling and recycling

Inclusive Education : Practices and Challenges Dr. Deepa Sikand Kauts, 2021-09-11 This book is an attempt to create awareness among practitioners and to strengthen the focus on inclusion in their strategies and future plans for education and highlight the areas that need particular attention to promote inclusive education and strengthen policy development With this we would move a step further and look into the current research trends in inclusive education as well as policy backdrops which provide us with the fair idea that how this idea of equity pedagogy is being propagated in the national educational policies of our country and further their translations in the Indian education realm Papers compiled exhibit major concerns issues challenges and various practices for ensuring inclusion and inclusive pedagogical strategies for effective inclusive education The researchers have also taken into account the social cultural and learning diversities and the factors that facilitate to spot and remove barriers to learning and participation in education It has the power to widen the scope of universal education by promoting access to all learners and accelerating educational equity too This book also focuses on how stakeholders can contribute to the continuous growth of inclusive education and its implications for society communities schools and classrooms as well to provide clarity on theoretical and research perspectives to promote the integration of theory and practice of inclusive education The volume will be highly beneficial for teachers parents policymakers administrators and students who care about the needs of the learners and the development of an equitable education system in our country

Chemistry of Phytopotentials: Health, Energy and Environmental Perspectives LD Khemani, MM Srivastava, Shalini Srivastava, 2011-12-02 Since the beginning of human civilization plants have been our true companions Plants contribute not only to our existence but also serve us through discovery design and the treatment of various diseases where there is no satisfactory cure in modern medicine This has focused Natural Product Chemists to unravel plants therapeutic potential in the light of modern analytical and pharmacological understandings Presence of multiple active phytochemicals in medicinal plants offers exciting opportunity for the development of novel therapeutics providing scientific justification for their use in traditional medicines Non food plants have been recognized as biofactories for the production of eco friendly value added materials including agricultural food products enzymes nutraceuticals etc They have also been widely explored for personal care industrial products and sources of energy generation The proven efficacy of botanicals has been appreciated by the scientific community and strengthened plant human relationship The synergism in the Phytoproducts the result of the interaction of two or more moieties is not simply

additive but multiplicative Recent acceptance of the Food and Drug Administration US for herbal medicine based preparation has renewed interest in Natural Product Research The year 2011 is declared as the International Year of Chemistry IYC 2011 by the United Nations Assembly On this occasion the present conference CPHEE 2011 aims to offer chemists from diverse areas to come to a common platform to share the knowledge and unveil the chemistry and magic potentials of phytoproducts for the mankind *Diversity and Dynamics in Forest Ecosystems* Munesh Kumar, Nazir A. Pala, Jahangeer A.

Bhat, 2021-12-28 Providing a wealth of in depth knowledge of forest ecosystems this new volume explores a collection of important topics on forest community dynamics It looks at the diversity of forest ecosystems and explores such aspects as forest products in enhancing local livelihoods and community participation forage production forest conservation and sustainable management regeneration patterns seed handling and more Chapters in *Diversity and Dynamics in Forest Ecosystems* present new research on forest products livelihood generation mechanisms of forest dependent communities utilization patterns of untapped resources from forests and the structure of different ecosystems from the tropical to the temperate landscape This book also features different drivers of community dynamics such as the role of seed handling in forests the influence of altitudinal variations and protected and community conserved forests on the forest diversity Chapters also consider the role of non timber forest products and their significance in livelihood diversification for tribal communities and forage crop genetic resources and forest resource extraction by forest fringe dwellers Also explored are aspects of soil organic carbon in agroforestry systems and integrated approaches of sustainable agroforestry development in diverse forest ecosystems This edition also examines the vegetation structure and regeneration aspects of timberline zone including diversity of herbaceous flora along the altitudinal gradient The abundance of in depth knowledge of the diversity and dynamics of forest ecosystems in this volume will be valuable in conservation and management of forests which play an important role in the world environment Forests are presently facing multiple disturbances and this volume will help forestry professionals and others formulate further strategies to mitigate global climate change and other challenges Technology

and Social Transformations in Hospitality, Tourism and Gastronomy Savita Sharma, Shivam Bhartiya, 2023-04-27 This book explores the relationship between technology and social transformation in tourism hospitality and gastronomy It presents research and case studies elaborating on benchmark practices adopted by tourism and hospitality professionals In recent years technology has transformed the tourism and hospitality industry the chapters in this book cover areas such as guest experience and service quality as well as operational areas such as housekeeping and waste management With contributions from academics entrepreneurs destination managers and government officials from the South Asia region this book offers a real insight in to these areas of growing interest and provide a useful resource for those researching and studying within the areas of tourism development and hospitality Climate Change in the Himalayas Amit Kumar, Wil De Jong, Munesh

Kumar, Rajiv Pandey, 2023-08-05 *Climate Change in the Himalayas Vulnerability and Resilience of Biodiversity and Forest*

Ecosystems explores and assesses issues affecting species survival in the rich forests of the Himalayan region. This book characterizes current biodiversity statuses, related ecosystem services, and provides new evidence and solutions for climate change effects on Himalayan animals and plants. Written by regional and international experts on climate change ecosystems and the Himalayas, this book analyzes current species threats, loss of habitats, and carbon effects. It identifies critical areas requiring special attention and provides workable solutions for protection and ecosystem services. As many plant and animal species continue to be classified as extinct due to climate change, urbanization, and failing ecosystems, analyses and techniques in this book offer resolutions for sustaining current risks and curbing future risks. These can also be applied to other biodiverse at risk regions of the world. Offers nature based solutions along with policy and governance measures such as the application of the UNFCCC Paris Agreement. Provides mitigation and adaptation processes for current and future climate change impacts. Includes a focus on soil sustainability.

A Textbook of Pharmacognosy And Phytochemistry-II

Dr. Sarvesh Suyal, Dr. Barkha Kamal, Dr. Pratibha Baluni, Ms. Garima Chauhan, 2025-10-17. The titled book is Textbook of PHARMACOGNOSY AND PHYTOCHEMISTRY II. As per PCI regulation, the idea of the book originated by authors to convey a combined database for easy understanding of PHARMACOGNOSY AND PHYTOCHEMISTRY II. The major aim to write this textbook is to provide information in articulate summarized manner to accomplish necessities of undergraduates as per PCI regulation. This volume is designed not only according to curriculum of undergraduate courses in pharmacy by PCI but also to communicate knowledge on Pharmacognosy and phytochemistry for post graduate learners. We assured this book will be originated very valuable by graduates, post graduates, professors, and industrial learners.

Biodiversity: An Overview

Mukesh Kumar, G.S. Paliwal, 2011-07-15. India's phytodiversity is one of the most significant in the world. India is one of the twelve mega biodiversity centers in the world and also an important center of origin of agrobiodiversity. It is therefore very important to study, document, and conserve the plant wealth of India and also of the world before its possible extinction. There are convincing scientific, economic, and sociological reasons for giving priority to the conservation of the major centers of plant diversity throughout the world. The strategies to conserve biodiversity include establishment of protected area network and corridors with emphasis on appropriate levels of management, reduction of anthropogenic pressure on natural populations by cultivating them elsewhere, programmes of augmentation, reintroduction, and introduction of target taxa, restoration of degraded habitats, etc. The conservation strategies can be either in situ conservation of genetic resources within their ecosystem and natural habitat or ex situ conservation of components of genetic material of biological diversity outside their natural habitat. The choice of conservation strategy depends upon the nature of the material to be conserved, i.e., the life cycle and mode of reproduction, size of individual population, and ecological status. Ex situ techniques include the establishment of botanical and zoological gardens, banks of pollen, seed, tissue culture, DNA, etc. Establishment of forest reserves, national parks, protected areas, and on-farm conservation of valuable plant varieties is being promoted to facilitate

their in situ conservation

Ecology of Himalayan Treeline Ecotone S P Singh, Zafar Ahmad Reshi, Rajesh

Joshi, 2023-02-21 This book brings together comprehensive multi disciplinary knowledge on diverse aspects of the Himalayan treeline ecotone which is considered one of the most sensitive ecosystems to climate change. The contents of this book are based on the results of extensive research and provide a holistic understanding of the treeline ecotone in Himalaya. The book will serve as an important reference manual and a textbook on treeline ecology. The book is unique in the sense that it provides an engaging account of almost all the aspects of the treeline ecotone such as taxonomic functional and phylogenetic species diversity, temperature lapse rates, tree phenology, water relations and stress physiology, tree ring width chronology and climate relationships and the role of treeline ecotone in human sustenance in the Indian Himalayan region. The treelines in the Himalaya being the highest in the Northern Hemisphere up to 4900 m are among the least investigated systems and hence this book is timely and fills all important knowledge gaps vis vis treeline shifts, physiognomic structural and functional changes in mountain landscapes and ecosystems particularly under the changing climate. This book for the first time summarizes evidence based knowledge about various aspects of treeline ecotone in Himalaya that was largely generated through a well coordinated team science approach. The book will be of interest to ecologists, climatologists, dendrochronologists, foresters, plant physiologists and resource managers and policy planners for a better understanding of the organization and dynamics of this fragile ecosystem in relation to climate change and other anthropogenic stresses that are rampant in the Himalaya. The book lays a solid foundation for further investigation of the ecology and dynamics of the treeline ecotone in the Himalayas and provides a rationale for pursuing a team science approach for macroecological investigations.

Sustainable Tourism Development

Anukrati Sharma, 2019-08-05 Exploring the importance of destination branding and destination marketing as well as their implications on sustainability in tourism, this book approaches the topic through the lens of destination image taking into account the large influence of appearance on tourist attraction. With consideration to various stakeholders in sustainable tourism development, this book incorporates ideas for new techniques in destination branding and marketing in order to maximize economic impact. The book also discusses the rising influence of social media on tourists' interest. Emphasizing sustainability in tourism development, the chapters address a number of important issues such as post disaster tourism, marketing culture and heritage tourism, eco tourism, community based nature tourism, community involvement in destination development, benchmarking for destination performance evaluation, sustainable food practices in tourism and more. Each chapter of this book incorporates a quantifiable trend in tourism development including various paradigms and studies that relay different statistics about certain areas of tourism. The book makes use of case studies for specific destinations and integrates strategies, evidence and analyses to offer a holistic understanding of the myriad factors involved in sustainable tourism development.

UN 2030 Agenda and Beyond H.C. Pokhriyal, B.S. Nagi, M.C. Sati, Padmakar Mishra, R.P. Juyal and A.S. Khullar,2023-01-01 Achieving the lofty Goal 4 of the UNSDGs which aims to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all will require the entire education system to be reconfigured a fact as aptly underlined in the National Education Policy 2020 of India This would essentially entail putting in place a very effective educational governance devised and formulated on the basis of cutting edge research outputs Three Volumes of the present book is a modest yet maiden attempt to comprehend and unfold the blending of diverse research methodologies and amply demonstrate through empirical findings that innovative policies and interventions curated on the basis of this approach of research can ensure quality education Governance emerges as one of the core areas for research Therefore Volume I provides a wide canvas of governance in general and educational governance in particular for research along with a unique opportunity to elaborate both the theory and practice of Quantitative Qualitative and Participatory Methodologies in researching governance that is the frontier challenge looking for suitable answers Volume II uniquely comprehends multiple aspects of quality in dynamic and wider perspectives as perceived by the primary stakeholders including community

Refreshing insight into the quality perspectives of educational governance will facilitate the researchers to explore innovative interventions in respective areas of human development Community is the third constituent of governance along with the state and the market Therefore Volume III explores a futuristic vision of community governance leading to quality education Also an attempt has been made to critically appraise the provisioning of community governance including the local self governments as well as free and compulsory elementary education The Book is a live comprehension of the conceptual framework of research and methods along with handling of research problems at the ground It is like explaining how to by giving suitable case studies conducted by the authors on educational governance It is hoped that the three Volumes will be an exciting learning experience that would enable us to address researching challenges over which the public policy makers researchers development administrators planners and students may build their concepts logical structures and planned interventions facilitating the achievement of effective educational governance at micro level ensuring quality education in the coming decades

Climate Change and Environmental Issues Narayan Singh,Amit Kumar Thakur,P L Sharma,Pankaj Sharma,2016-06-01 Climate change is one of the greatest challenges of the 21st century Climate is changing across our planet largely as a result of human activities The indicators of climate change include physical responses such as changes in the surface temperature atmospheric water vapour severe climatic events melting of glaciers and a rise in sea level Mountain ecosystems being exceptionally fragile are prone to both natural and anthropogenic drivers of change which ranges from volcanic and seismic events and flooding to global climate change and of vegetation and soils resulting from inappropriate agricultural and forestry practices and extractive industries Environmental issues directly affect agricultural productivity famine and pandemics health economy and ecology In this light environmental protection the practice of protecting the environment on individual community organizational or governmental level assumes a significant role This book provides a holistic coverage of the basics of climate change changes in biodiversity phytosociological changes and thus proposes a comprehensive set of solutions to resolve various issues related to environment and climate change This book would be beneficial for researchers policy makers academicians environmentalists and university students

Green Approaches in Medicinal Chemistry for Sustainable Drug Design Bimal Banik,2024-06-01 Extensive experimentation and high failure rates are a well recognised downside to the drug discovery process with the resultant high levels of inefficiency and waste producing a negative environmental impact Sustainable and Green Approaches in Medicinal Chemistry Second Edition reveals how medicinal chemistry can play a direct role in addressing this issue After providing essential context to the growth of green chemistry in relation to drug discovery the book goes on to identify a broad range of practical techniques and useful insights revealing how medicinal chemistry techniques can be used to improve efficiency mitigate failure and increase the environmental benignity of the entire drug discovery process Drawing on the knowledge of a global team of experts Sustainable and Green Approaches in Medicinal Chemistry 2e encourages the growth of green medicinal chemistry

and supports medicinal chemists drug discovery researchers pharmacologists and all those in related fields across both academia and industry in integrating these approaches into their own work This first volume of the second edition covers synthesis methods following green chemistry principles contributing to sustainability by saving energy using lesser toxic reagents solvents catalysts and environmentally benign sources including plants and agricultural materials Highlights the need for the adoption of sustainable and green chemistry pathways in drug development Reveals risk factors associated with the drug development process and the ways sustainable approaches can help address these factors Identifies novel and cost effective green medicinal chemistry approaches for improved efficiency and sustainability
