and diagrams that are often used and needed by architects concrete engineers inspectors superintendents foremen
carpenters contractors draftsmen designers house owners and prospective house owners in fact every one engaged in any
profession or trade connected with building of concrete or in any way interested therein The aim of the publishers has been
to elect from the vast amount of material on hand only that portion which is most likely to be used in connection with daily
work or which will be most frequently consulted Although the treatment of some subjects is of necessity brief it has been the
aim to so distribute the space available that it would cover the more important subjects as fully as possible It has been found
impracticable to give tables for the strength of concrete beams and slabs because the stresses employed are subject to city

regulations Until the large cities adopt uniform requirements such tables cannot come into general use About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
