Ophthalmic Biomaterials Laura Wells,Heather Sheardown,2025-06-11 Advances in technology have rapidly changed the way we treat ophthalmic diseases especially with the development of new biomaterials used as

prosthetics for drug delivery devices or to regenerate tissue Bridging the gap between biomaterials scientists and ophthalmologists this book includes overviews of devices and cutting edge research on current and future strategies to treat acute and chronic diseases in the eye Edited by leaders in the field the book provides perspectives for both biomaterials scientists and ophthalmologists Biomaterials scientists are given a background to the challenges in ophthalmology that advanced materials could solve Ophthalmologists are provided a background on materials to enable them to better understand the devices they are using and their advantages and challenges All readers are provided with a critical review of the current and future state of devices that are being used or are under development in devices regenerative medicine and drug delivery This book is for those working in biomaterials science biomedical engineering chemical engineering and clinicians specialising in ophthalmology as well as those working in polymer science based medical technologies

Generating evidence for artificial intelligence-based medical devices ,2021-11-18 *Bioresorbable Materials and Bioactive Surface Coatings* Anoushka Khanna,Navneet Sharma,Bhupendra Singh Butola,Harpal Singh,2025-09-12

Bioresorbable Materials and Bioactive Surface Coatings Biomedical Implants and Tissue Regeneration provides a detailed review of biomaterials specially designed for use in biomedical implants tissue repair and regeneration A wide range of resorbable materials are covered including polymers bioceramics metallic alloys and dissolvable electronics as well as their properties degradation kinetics and potential clinical uses The book also explores bioactive surface modifications highlighting their importance in enhancing the functionality of bioresorbable materials Various coatings and surface modifications are covered such as bioactive ceramic coatings biofunctional polymer coatings and surface modifications for enhanced osseointegration cardiovascular applications and neural interfaces Additionally regulatory guidelines for bioresorbable medical devices ethical considerations and environmental implications are analyzed Details the fabrication techniques properties applications and challenges of each material and implant type Covers a range of applications including orthopedics neural engineering drug delivery and cardiovascular implants Reviews the qualities and benefits of various bioresorbable and bioactive materials such as polymers alloys ceramics and composites **Strategic Innovative**

Marketing Damianos P. Sakas,Dimitrios K. Nasiopoulos,2019-05-25 This proceedings volume highlights cutting edge approaches for contemporary issues evolved in strategic marketing and the integration of theory and practice It focuses on strategic research and innovative activities in marketing that can be used in everyday operations The contributions have been divided into eight sections grouping emerging marketing technologies together in a close examination of practices problems and trends The first section examines management challenges which influence societies cultures networks organizations teams and individuals It emphasizes ways business processes foster innovation and facilitate management transitions from dominant structures to more evolutionary developmental paradigms The second section discusses the benefits and guidelines to implementation of green marketing strategies The following section pursues new perspectives of

the role of location in marketing and its impact on consumer well being The next section explores the impacts of user generated content UGC on marketing theories and practice which is followed by a section identifying how market based assets can contribute to a sustainable competitive advantage The sixth section covers understanding consumer perception to make marketing decisions The final sections promote the use of business informatics and modeling in marketing and also the development of integrating information management in ways that change how people use information to engage in knowledge focused activities The papers from the proceedings of the 6th International Conference on Strategic Innovative Marketing IC SIM 2017 have been written by scientists researchers practitioners and students that demonstrate a special orientation in strategic marketing all of whom aspire to be ahead of the curve based on the pillars of innovation This proceedings volume shares their recent contributions to the field and showcases their exchange of insights on strategic issues in the science of innovation marketing

Framing Asian Studies Albert Tzeng, 2018-05-24 This book explores the interconnection between geopolitical context and the ways this context frames our knowledge about Asia highlighting previously neglected cause effect relations It also examines how various knowledge institutions promote and shape Asian Studies The authors seek to explain why Asian Studies and its subfields developed in the way they did and what the implications of these transformations might be on intellectual and political understandings of Asia The book not only builds on the current debates on the decolonization and de imperialization of knowledge about Asia it also proposes a more multifaceted view rather than just examining the impact of the West on the framing of Asian Studies

Polymers in Modern Medicine (Part 1) Sachin Namdeo Kothawade, Vishal Vijay Pande, 2024-12-11 Polymers in Modern Medicine Part 1 offers an in depth exploration of the transformative role of polymers in healthcare and medical innovation This comprehensive book examines the diverse applications of polymeric materials in areas such as controlled drug delivery tissue engineering diagnostics regenerative medicine and personalized therapies With chapters spanning polymeric scaffolds nanotechnology smart polymers biopolymers and polymer based implants it provides detailed insights into the science and technology shaping modern medicine The book also highlights cutting edge advancements in polymeric coatings for medical devices cancer nanomedicine and vaccine development emphasizing sustainability and biocompatibility Key Features Latest advancements in polymer nanotechnology scaffolds hydrogels and smart polymers Applications in drug delivery prosthetics diagnostics and regenerative medicine Discusses biocompatible sustainable and personalized polymeric materials Bridges the gap between academia industry and clinical research

Bioactive Glass Materials for Biological Applications Gujjala Raghavendra, P. Syam Prasad, Dheeraj Kumar Gara, 2025-09-04 Bioactive Glass Materials for Biological Applications envelopes the complexities challenges and advancement in developing a new class of bioactive materials for versatile applications It outlines the materials involved bioactivity against bioinert materials phase change materials biomolecular nature synthetic biodegradable polymers and bioactive glasses The processing techniques of the bioactive glasses for

versatile applications are also covered A comprehensive focus is on the review of additive manufacturing routes suitable for biological applications with the ability to print various bioactive materials whilst carrying living cells Features Introduces bioactive glass materials and their nature aimed towards biological applications Covers how biological materials behave in vivo and in vitro for tailoring materials and sensitivity to the biological environment Explores relevant additive manufacturing platforms Reviews new chemistry and molecules for therapeutic and drug delivery applications alongside bone tissue and regenerative medicine Spotlights the future scope of bioactive glass nanoparticles their limitations and research focus areas This book is aimed at graduate students and researchers in glasses and ceramics and biomaterials **3D Printing in**

Healthcare Rishabha Malviya,Rishav Sharma,2024-12-05 The main goal of this book is to explore the application of 3D printing in medicine and healthcare that could revolutionize drug development and medical equipment production and also improve supply chains pharmaceuticals and healthcare In the fields of medicine pharmaceuticals surgical planning and personalized medical treatment the novel emergence of 3D printing technology has opened a wide range of potential applications With personalized solutions that were previously impossible 3D printing has opened up novel possibilities in patient care from developing unique medications to manufacturing prosthetics and implants that are particular to each patient The 14 chapters in this volume present the reader with an array of subjects including the evolution and background of 3D printing charting its extraordinary path from its inauspicious origins to its current significance in the field of healthcare Also discussed are the many kinds of 3D printers that are employed in additive manufacturing as well as how they are modified for usage in medical settings the current developments in medical science brought about by 3D printing technology including the clinical uses of 3D printed models in different medical domains ranging from cardiovascular illness to tumors and congenital heart disease personalized medicine and the creation of dosage forms utilizing 3D printing methods the benefits and drawbacks of various 3D printing technologies and the applications of these technologies in healthcare including the creation of immediate release tablets capsules and implants for a range of illnesses the possibilities of 3D printed anatomical models for surgical planning the roles of 3D printing technologies that are used to produce surgical guides knee implants spinal implants and other patient specific applications the current developments in 3D printed medication delivery devices including regulatory concerns the field of personalized medicine using 3D printing and discusses organ models for preoperative diagnostics permanent non bioactive implants local bioactive and biodegradable scaffolds and direct printing of tissues and organs the different specialized uses of 3D printing in the medical field covering topics including hospital management and administration surgical training for urological operations ophthalmology and preserving safety and efficacy in point of care Audience The book will be widely read by all healthcare professionals biomedical engineers researchers and graduate students who are seeking to expand their knowledge of efficient techniques of 3D printing technology in the healthcare sector The Future of Pharmaceutical Product Development and Research ,2020-08-19 The Future of

Pharmaceutical Product Development and Research examines the latest developments in the pharmaceutical sciences also highlighting key developments research and future opportunities Written by experts in the field this volume in the Advances in Pharmaceutical Product Development and Research series deepens our understanding of the product development phase of drug discovery and drug development Each chapter covers fundamental principles advanced methodologies and technologies employed by pharmaceutical scientists researchers and the pharmaceutical industry The book focuses on excipients radiopharmaceuticals and how manufacturing should be conducted in an environment that follows Good Manufacturing Practice GMP guidelines Researchers and students will find this book to be a comprehensive resource for those working in and studying pharmaceuticals cosmetics biotechnology foods and related industries *Multifunctional Nanostructured Coatings* Manviri Rani,Uma Shanker,2025-03-29 Multifunctional Nanostructured Coatings Biomedical Environmental and Energy Applications offers core and advanced information about various nanomaterials and their synthetic approaches to nanostructured coatings The book focuses on the application of multifunctional nanostructured coatings MNCs in the areas of biomedicine the environment and energy and presents the latest advances in the design preparation characterization and fabrication of MNCs Techniques covered in the book include chemical deposition including plasma assisted deposition and physical deposition methods such as magnetron sputtering arc evaporation electron beam evaporation and ion beam sputtering In addition the book also explores the use of multifunctional ZnO TiO₂ nanoarray composite coatings Ta and Si doped multifunctional bioactive nanostructured films in situ generated titanium oxo clusters and silver nanoparticles It will be useful for researchers working in the areas of materials science coating technologies nanotechnology sustainability and environmental engineering Highlights the latest methods in the design preparation characterization and fabrication of MNCs Provides detailed information on the biomedical energy and environmental applications of MNCs Assesses the major challenges in making nanomaterials based coatings more reliable and cost effective Considers current prospects and future trends within the MNC industry Designing Materials For Medical Devices: Fundamentals Swee-hin Teoh,2024-12-17 The success of any implant or medical device depends very much on the biomaterial used Synthetic materials such as metals polymers and composites have made significant contributions to many established medical devices The aim of this book is to provide a basic understanding on the engineering and processing aspects of biomaterials used in medical applications Of paramount importance is the tripartite relationship between material properties processing methods and design As the target audiences cover a wide interdisciplinary field each chapter is written with a detailed background so that audience of another discipline will be able to understand For the more knowledgeable reader a detailed list of references is included *The Combination Products Handbook* Susan Neadle,2023-05-16 Combination products are therapeutic and diagnostic products that combine drugs devices and or biological products According to the US Food and Drug Administration FDA a combination product is one composed of any combination of a drug

and a device a biological product and a device a drug and a biological product or a drug device and a biological product Examples include prefilled syringes pen injectors autoinjectors inhalers transdermal delivery systems drug eluting stents and kits containing drug administration devices co packaged with drugs and or biological products This handbook provides the most up to date information on the development of combination products from the technology involved to successful delivery to market The authors present important and up to the minute pre and post market reviews of international combination product regulations guidance considerations and best practices This handbook Brings clarity of understanding for global combination products guidance and regulations Reviews the current state of the art considerations and best practices spanning the combination product lifecycle pre market through post market Reviews medical product classification and assignment issues faced by global regulatory authorities and industry The editor is a recognized international Combination Products and Medical Device expert with over 35 years of industry experience and has an outstanding team of contributors Endorsed by AAMI Association for the Advancement of Medical Instrumentation
