Multilevel and Longitudinal Modeling Using Stata, Second Edition Sophia Rabe-Hesketh, Anders Skrondal, 2008-02-07

This textbook looks specifically at Stata s treatment of generalized linear mixed models also known as multilevel or hierarchical models These models are mixed because they allow fixed and random effects and they are generalized because they are appropriate for continuous Gaussian responses as well as binary count and other types of limited dependent variables

A Handbook of Statistical Analyses Using S-PLUS Brian S. Everitt, 2019-05-07

A Handbook of Statistical Analyses Using SAS Geoff Der, 2017-11-15

Updated to reflect SAS 9 2 A Handbook of Statistical Analyses using SAS Third Edition continues to provide a straightforward description of how to conduct various statistical analyses using SAS Each chapter shows how to use SAS for a particular type of analysis The authors cover inference analysis of variance regression generalized linear models longitudinal data survival analysis principal components analysis factor analysis cluster analysis discriminant function analysis and correspondence analysis They demonstrate the analyses through real world examples including methadone maintenance treatment the relation of cirrhosis deaths to alcohol consumption a sociological study of children heart transplant treatment and crime rate determinants With the data sets and SAS code available online this book remains the go to resource for learning how to use SAS for many kinds of statistical analysis It serves as a stepping stone to the wider resources available to SAS users

Multilevel and Longitudinal Modeling Using Stata, Volume II Sophia Rabe-Hesketh, Anders Skrondal, 2012-04-02

Volume II is devoted to generalized linear mixed models for binary categorical count and survival outcomes The second volume has seven chapters also organized in four parts The first three parts in volume II cover models for categorical responses including binary ordinal and nominal a new chapter models for count data

and models for survival data including discrete time and continuous time a new chapter survival responses The final part in volume II describes models with nested and crossed random effects with an emphasis on binary outcomes
